## ASSIGNMENT

WHEREAS, I, Aaron J. Rollins (hereinafter referred to as "Assignor"), desires to sell and assign United States nonprovisional patent Application Serial No. 13/924,641, filed on June 24, 2013, ("the Application"), entitled LASER NIL LIPOSUCTION SYSTEM AND METHOD ("the Invention").

WHEREAS, Rollins Enterprises, LLC, a Delaware limited liability company, with a mailing address of 21700 Oxnard Street, #2030, Woodland Hills, CA 91367, is desirous of acquiring the entire right, title, and interest in and to Invention and any and all patent(s) and/or patent application(s) issued or filed thereon.

NOW, THEREFORE, for and in consideration of One Dollar (\$1.00), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by Assignor, the parties hereto agree as follows:

1. Assignor does hereby sell, assign, and transfer to Assignee, its successors and assigns, the Assignor's entire right, title and interest in and to:

- (i) the Invention and worldwide rights therein;
- (ii) the Application and all continuations, divisionals, continuations-in-part and substitutions thereof;
- (iii) all patents which shall issue for the Invention including, without limitation, any and all provisionals, nonprovisionals, divisionals, continuations, continuations-in-part, and/or any other applications therefor as well as any and all reissues, reexaminations, renewals and extensions thereof, for the United States, its territories and possessions and all foreign countries, including the exclusive right to file and prosecute corresponding patent applications on and for the Invention in the United States and in any and all foreign countries, and to claim priority under any and all treaties and conventions to which the United States of America is signatory including the Patent Cooperation Treaty and the Paris Convention for the Protection of Industrial Property for such corresponding applications, or any divisional, continuation, continuation-in-part or substitution thereof, the same to be held and enjoyed by Assignee, its successors and assigns, as fully and entirely as the same would have been held and enjoyed by Assignor, had this assignment not been made; and
- (iv) all rights to past, present and future claims of any kind including, without limitation, the right to sue for patent infringement and to recover and retain any and all damages paid or received as a result of the litigation, settlement, and/or pursuit of such claims.

2. Assignor covenants and agrees that he or she will, at any time upon the request and at the expense of Assignee, execute and deliver any and all papers and do all affirmative and lawful acts that may be necessary or desirable, in the opinion and sole discretion of Assignee, to enable and assist Assignee to:

- (a) obtain patents, both domestic and foreign, on and for the Invention, including, without limitation, reviewing and executing any and all patent applications, assignments, declarations, powers of attorney, affidavits, and any other papers and documents in connection with the Invention and the patents and patent applications sold, assigned and transferred under Section 1 of this Assignment, that Assignee may deem necessary or prudent to perfect such patent rights and to obtain and maintain such patents and patent applications;
- (b) establish, maintain and secure title in and for Assignee, its successors and assigns, to the Invention, the patents and patent applications sold, assigned and transferred under Section 1 of this Assignment, including making such title lawful public record, whether through recordation with the United States Patent and Trademark Office, foreign patent office(s) or other means; and
- (c) defend, enforce, establish or otherwise preserve the validity of the patents and patent applications sold, assigned and transferred under Section 1 of this Assignment against any and all infringers, and perform such other acts as are necessary to give full force and effect to this Assignment,

including, without limitation, testifying in any and all legal proceedings, and making all lawful oaths and declarations, which Assignee, its successors and assigns, deem necessary or prudent.

3. Assignor hereby represents and warrants that he or she is the sole lawful owner of all rights in and to the Invention; that no assignment, mortgage, sale, license, pledge, encumbrance or alienation of the Invention or the patents and patent applications sold, assigned and transferred under Section 1 has been or will be made or entered into which would conflict with this assignment and sale; and that he or she has the full legal right and authority to assign and convey the entire right, title and interest herein assigned and sold. Assignor further represents and warrants that he has not executed, and will not execute, any other agreement(s) in conflict herewith.

4. Assignor hereby irrevocably constitutes and appoints Assignee and any officer or agent thereof, with full power of substitution, as his or her true and lawful attorney-in-fact, with full irrevocable power and authority in his or her name to take any and all action and to execute thereafter any and all documents and instruments which Assignee deems necessary or desirable to accomplish the purposes of this Assignment. Assignor further grants Assignee and its duly authorized attorneys and agents the power to insert on this Assignment any further identification which may be necessary or prudent in order to comply with the rules of the United States Patent and Trademark Office, any foreign patent office, or any other legal entity or body whatsoever, for recordation and enforcement of this Assignment.

5. This Assignment shall be binding upon Assignor, his or her heirs, executors, agents, successors, and assigns.

6. This Assignment may be executed in multiple counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Facsimile and scanned signatures sent by e-mail shall be considered as original signatures. .
