**ASSIGNMENT OF PATENT APPLICATION AND
ANY PATENTS THAT MAY ISSUE THEREFROM**

I/We, each of the undersigned, hereinafter referred to as "Assignor," is/are the inventor/s ("Inventor") of the inventions ("Invention") described and set forth in the below-identified application/s ("Application") for United States Letters Patent:

"APPLICATION"

Robotic Vacuum with Rotating Cleaning Apparatus

Filing Date: 1/23/2018

Application No.: 15878228

WHEREAS, the Assignor, in furtherance of its obligations to **AI Incorporated**, having a registered address at 334 Adelaide Street West Toronto ON CA M5V 0M1 (hereinafter "Assignee"); and for good and valuable consideration, receipt of which is hereby acknowledged by Assignor; has agreed to and hereby agrees to and hereby does assign and transfer to Assignee:

all right, title, and interest in and to the Invention and Application (including any divisional, renewal, continuation in whole or in part, substitution, conversion, and/or amendment applications) and to all foreign counterparts (including patent, utility model, and industrial designs) thereto, and in and to any Letters Patent and Registrations which may hereafter be granted on the same in the United States and all countries throughout the world (including those granted as a result of reissues, reexaminations, post-grant review, or any other formal proceeding); and the right to claim the priority from the Application as provided by the Paris Convention and others. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assign as fully and exclusively as it would have been held and enjoyed by Assignor had her/his Assignment not been made, for the full term of any Letters Patent and Registrations which may be granted thereon, or of any divisional, renewal, continuation in whole or in part, substitution, conversion, reissue, prolongation, or extension thereof.

The aforesaid assignment includes the Assignor's right in and to all income, royalties, damages, and payments now, in the past, or hereafter due or payable that may be granted, and in and to all causes of action (either in law or in equity), and the right to sue, counterclaim, and recover for past, present, and future infringement of any Patent that may issue from the Invention and Application throughout the world, as fully and entirely as the same would have been held by Assignor had this assignment not been made.

Assignor further agrees that s/he will, without charge to Assignor, but at Assignee's expense, (a) cooperate with Assignee in the prosecution of U.S. Patent applications and foreign counterparts on the invention and any improvements, (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer, and (c) perform such other acts as Assignee lawfully may request to obtain or maintain Letters Patent and Registrations for the invention and improvements in any and all countries, and to vest title thereto in Assignee, or Assignee's successors and assigns. In addition, Assignor agrees not to challenge

ASSIGNMENT AGREEMENT

the validity and/or enforceability of the Invention and Application and any Patent that may issue therefrom or aid, abet, encourage, participate in, or induce any such challenge by a third party.

Assignor covenants with Assignee, its successors, assigns and legal representatives, that the Invention and Application and any Patent that may issue therefrom and the rights being conveyed herein are free and clear of any encumbrances, and Assignor has full right to convey the same as expressed herein.
