ASSIGNMENT

Whereas, Health & Bliss LLC, a corporation of Maryland having a place of business at 5920 Charles Crossing, Ellicott City, MD 21043, (hereinafter "Assignor") owns the entire right, title and interest in and to the inventions disclosed in:

Title of the Invention: SELF-CONTAINED DIAGNOSTIC TEST WITH ADVANCEABLE TEST STRIP

and further identified by the Docket Number provided above in the header of this Assignment, for which an application for a United States Patent was filed on May 31, 2013, having U.S. Patent Application No. 13/907,373.

Whereas, Test Anywhere Technology, a corporation of Delaware having a place of business at 2236 Branch Creek Dr., Mt. Pleasant, SC 29466 (herein referred to as "Assignee"), desires to acquire, and Assignor desires to grant to Assignee, the entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, Assignor hereby sells, assigns, and otherwise transfers to Assignee, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application, and any and all other patent applications and patents for the Invention which may be applied for or granted therefore in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents. In addition, Assignor hereby authorizes and requests the Director of the United States Patent and Trademark Office to issue any United States Patent, and foreign patent authorities to issue any foreign patent, granted for the Invention, to Assignee, its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the same to be held and enjoyed by Assignee, its successors, legal representatives, and assigns to the full end of the terms for which any and all such patents may be granted, as fully and entirely as would have been held and enjoyed by the undersigned had this Assignment not been made; and Assignor agrees to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents and applications, in Assignee, its successors, legal representatives, and assigns, whenever requested by Assignee, its successors, legal representatives, or assigns.

Assignor acknowledges their prior and ongoing obligations to sell, assign, and transfer the rights under this Assignment to Assignee and is unaware of any reason why they may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith. Assignor also hereby grants Assignee, its successors, legal representatives, and assigns, the right to insert in this Assignment any further identification (including, but not limited to, patent Application Number) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of South Carolina, and any disputes will be resolved in a South Carolina state court or federal court sited in South Carolina.

[Inventor Signature Page(s) Follows]

The undersigned hereby authorize the patent practitioners filing the U.S. Patent Application referenced herein to add the application serial number and filing date to this assignment document.
