WHEREAS, Assignor has agreed to sell, convey, assign, transfer and deliver to Assignee, and Assignee has agreed to purchase, acquire and accept from Assignor, for good and valuable consideration, all of Assignor's right, title and interest in, to and under certain assets, and pursuant to the Laws of any jurisdiction throughout the world, including ideas, concepts, inventions, discoveries, designs, algorithms, schematics, developments, improvements, utility models, formulas, methods, procedures, and processes, whether patentable or not, and all design, plant and utility patents or patent applications, including pending or abandoned patent applications, provisional applications and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals of such patents and applications (collectively, the "Patents"); and all rights to sue and recover and retain damages, costs and attorneys' fees for past, present and future infringement and any other rights relating to any of the foregoing (the Patents also referred to herein as the "Intellectual Property");

WHEREAS, Assignor owns Patents registered or applied for as set forth in Schedule A attached hereto (hereinafter, the "Listed Patents"); and

WHEREAS, Assignee is desirous of acquiring all worldwide right, title and interest in, to and under the Intellectual Property; and

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound hereby, agree as follows:

1. Assignment of IP. Assignor hereby sells, conveys, assigns, transfers and delivers to Assignee, and Assignee hereby purchases, acquires and accepts from Assignor all of Assignor's right, title and interest, as of the Effective Date, in and to the Patents, including the Listed Patents, and any extensions, supplemental protection certificates, reexaminations, reissues, divisions and continuations (including continuations-in-part), with all claims, causes of action and enforcement rights of any kind, and all rights to sue or otherwise bring actions for past, present or future infringement of the Patents.

The foregoing assignment in this Section 1 includes all rights to (i) apply for, file, register, maintain, extend, or renew the Intellectual Property, and to transfer same and grant licenses and other rights with respect thereto, and (ii) collect royalties and other payments under or on account of any of the Intellectual Property.

It is hereby covenanted that Assignor has full right to convey the entire interest herein assigned, and that Assignor has not executed and will not execute any agreement in conflict herewith, and Assignor further covenants and agrees that it will, each time a request is made and without undue delay, execute and deliver all such papers as may be necessary or desirable to perfect the title to said Intellectual Property in said Assignee, his successors, assigns, nominees, or legal representatives.

4. Amendment: Waiver. Any provision of this IP Assignment Agreement may be amended or waived if, and only if, such amendment or waiver is in writing and signed, in the case of an amendment, by Assignee and Assignor, or in the case of a waiver, by the Party against whom the waiver is to be effective. No failure or delay by any Party in exercising any right, power or privilege hereunder shall operate as a waiver thereof nor shall any single or partial exercise thereof preclude any other or further exercise thereof or the exercise of any other right, power or privilege.
