(Group I)

This PATENT ASSIGNMENT (this "Patent Assignment") of January 23, 2017 (the "Signing Date"), is from Morgan Lars Ake Gustavsson, an individual ("Gustavsson"), and Paul Binun, an individual ("Binun"), to Skarp Technologies (Delaware) Inc., a Delaware corporation ("Assignee"). Gustavsson and Binun are sometimes collectively referred to herein as "Assignors."

RECITALS

- A. Assignors are inventors of the Assigned Patents (as defined below).
- B. Assignors desire by execution of this Patent Assignment to assign all of Assignors' right, title, and interest in and to the Assigned Patents to Assignee, and Assignee desires by execution of this Patent Assignment to accept the assignment of all of Assignors' right, title, and interest in and to the Assigned Patents to Assignee.

AGREEMENTS

For valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and in consideration of the covenants and agreements set forth herein, Assignors and Assignee mutually agree as follows:

1. Definition of Assigned Patents. The term "Assigned Patents" shall mean the patents and patent applications listed in Appendix A attached hereto, together with all provisional applications related thereto and divisionals, reissues, continuations, revisions, renewals, extensions, and reexaminations thereof and any patents issued as a result of such patent applications, as well as: (a) all rights to claim priority in any Assigned Patents and all rights in and to any and all improvements which are disclosed in any Assigned Patents; (b) any and all patents maturing from a continuation, divisional, reissue, reexamination, or international counterpart of any Assigned Patents and regardless of whether such patent matures from a convention or non-convention application, or any other substitution, renewal, extension, addition, utility model, or other United States or foreign patent; (c) all renewals thereof; and (d) all rights of action, powers and benefits accrued thereto, including the right to sue for and/or initiate any proceeding to collect damages and payments for past or future infringements thereof, as well as all claims for damages and all remedies arising out of any violation of the rights assigned hereby that may have accrued prior to the date of assignment to Assignee, or may accrue hereafter, including, but not limited to, the right to sue for, collect, and retain damages for past infringements of said Assigned Patents before or after issuance.

2. Assignment of the Assigned Patents. Assignors hereby sell, assign, and transfer to Assignee all of Assignors' right and title to and interest in the Assigned Patents. Assignors hereby authorize and request the Commissioner of Patents of the United States, and any Official of any country or countries foreign to the United States, whose duty it is to issue patents on applications as aforesaid, to issue all related Letters Patent to the Assignee, its successors, legal representatives and assigns, in accordance with the terms of this instrument.

3. Payments by Assignee to Assignors. In consideration for the sale, assignment and transfer of the Assigned Patents, Assignee shall pay (i) Gustavsson the sum of \$1.00 and (ii) Binun the sum of \$1.00, the receipt of which hereby is acknowledged by each of Gustavsson and Binun.

4. Further Assurances and Documentation. Upon request by Assignee, Assignors will take, or cause to be taken, all actions and do, or cause to be done, all things reasonably necessary, proper or appropriate to confirm Assignee's ownership of the Assigned Patents and to otherwise effectuate the transactions contemplated by this Patent Assignment, including but not limited to executing any additional documents as may be necessary in order to record this Patent Assignment in any jurisdiction pursuant to the applicable rules of such jurisdiction. Assignors further agree to: (a) cooperate with Assignee at Assignee's expense in the prosecution and protection of the Assigned Patents; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Assigned Patents in any and all countries.

5. Governing Law. This Patent Assignment shall be governed by the laws of the State of California and the patent laws of the United States without giving effect to any rule or provision thereof which would cause the application of the law of any other state.

6. Recording. Assignee and Assignors hereby authorize the Commissioner of Patents and Trademarks of the United States, and any official of any other country empowered to issue patents, to record this Patent Assignment.
