ASSIGNMENT

I, **Neal Dilip Amin**, of San Diego, California, a citizen of the United States of America, have invented a certain invention entitled MOTOR NEURON-SPECIFIC EXPRESSION VECTORS, which is disclosed in the following patent applications:

U.S. Patent Application No.15/576,587, filed on November 22, 2017, entitled "MOTOR NEURON-SPECIFIC EXPRESSION VECTORS ".

The invention was made as a result of my activities at or on behalf of the Salk Institute for Biological Studies or as a result of my utilization of information, facilities or other resources of the Salk Institute for Biological Studies. The conditions under which said invention(s) was made are such as to entitle the **Salk Institute for Biological Studies** to my entire right, title, and interest in the invention(s) and the patent applications in the United States and its territories and dependencies, and all other countries of the world.

In consideration of my Obligations and other valuable consideration, I, the undersigned, hereby sell, assign, and transfer to the **Salk Institute for Biological Studies** (hereinafter, "Salk Institute"), its successors and assigns, my full and exclusive right, title, and interest in the invention(s) and the patent applications throughout the United States of America and its territories and dependencies, and all other countries of the world. This includes an assignment of all non-provisional patent applications and any Letters Patent that may be granted on the invention(s) for corresponding non-provisional patent applications in the United States of America and all countries throughout the world, and any divisional, renewal, continuation in whole or in part, substitution, conversion, reissue, prolongation or extension thereof; and the right to claim priority from the provisional patent applications as provided for by United States law, the Patent Cooperation Treaty, the European Patent Convention, the Paris Convention, or other applicable law.

I authorize and request the issuance of said Letters Patent to the Salk Institute as assignee of the entire right, title, and interest to be held as fully and entirely as the same would have been held by me had this assignment not been made.

I warrant that there are no outstanding assignments, grants, liens, encumbrances, or agreements either written, oral, or implied that will impair, diminish, limit, or abridge the interest herein conveyed at the time of the execution of the present assignment.

I also agree upon reasonable request to communicate to the Salk Institute, its representatives, successors, assigns, or agents, any facts known to me respecting the invention(s), and testify in any legal proceedings, sign all lawful papers, execute all non-provisional, divisional, continuing, and reissue applications, make all rightful oaths, provide all requested documents, and do everything reasonably possible to aid the Salk Institute, its representatives, successors, assigns, or agents to obtain and enforce proper patent protection for the invention(s) in the United States or any foreign country. These provisions are binding upon my respective heirs, legal representatives, administrators and assigns.

IN TESTIMONY WHEREOF, the Assignors have signed his/her names on the date indicated below.

Dated: 2/1/18

INVENTOR

Ned D. Amos

Witnessed by: Name Mamatha Challa
Please Print or Type Name

Signature: 

The undersigned is authorized to sign this document on behalf of **Salk Institute for Biological Studies**.

Executed at La Jolla, CA on the 2nd day of July, 2018.
