ASSIGNMENT

WHEREAS, Bumble BE Holdings, LLC, a California Limited Liability Company having a place of business at 5900 Wilshire Blvd., Suite 2250, Los Angeles, CA 90036 United States of America, (hereinafter "Assignor") has full right, title, and interest in U.S. Patent No. D745,135, issued on 12/8/2015, entitled, "EARPLUG" (hereinafter "Invention").

AND

WHEREAS, Steven Daniel Butler of 18501 Wilton Place, Torrance, CA 90504, United States of America (hereinafter "Assignee") does hereby acquire the entire right, title, and interest in the Invention within the United States of America and its territorial possessions, and in all foreign countries in which intellectual or industrial property protection may be granted therefor.

NOW, THEREFORE, for good and valuable consideration, the receipt whereof is hereby acknowledged, the Assignor desires to and does hereby assign, sell, and transfer unto Assignee the full and exclusive right to the Invention in the United States of America and its territorial possessions and in all foreign countries, as well as, the entire right, title and interest in and to any and all intellectual or industrial property rights including, but not limited to, Patents, designs, utility models, and inventor certificates which may be granted therefore in the United States of America and its territorial possessions and in all foreign countries. Assignor hereby authorize and requests the U.S. Patent Offices and the equivalent offices at foreign countries, to issue to the Assignee, any and all applicable intellectual or industrial property rights in the Invention, for the Assignee's sole use and benefit; and for the use and benefit of his legal representatives, to the full end of the term for which United States and foreign Patents or the like may be granted, as fully and entirely as the same would have been held by Assignor had this assignment and transfer not been made.

Assignor further covenants and agrees with the Assignee that Assignor has a full and unencumbered title to the Invention hereby assigned, which title Assignor warrants unto the Assignee, and Assignor further agree that Assignor will, without demanding any further consideration therefore, at the request and at the expense of the Assignee, do all lawful and just acts, including the execution and acknowledgment of instruments, that may be or become necessary for obtaining, sustaining, extending, reissuing or reexamining United States and foreign Patents or the like for the Invention, and for maintaining and perfecting the Assignee's right to the Invention and any and all intellectual or industrial property rights in it, particularly in cases of interference, conflict, opposition and litigation.

IN TESTIMONY WHEREOF, I have hereunto set my hand.

Executed this 9th day of October, 2018, at Torrance, California.
