ASSIGNMENT AND AGREEMENT

WHEREAS, I, Adi Mashiach (the "Inventor"), have invented a certain invention or inventions related to "Electrode configuration for implantable modulator" and being described in U.S. Nonprovisional Application No. 14/144,296, filed on December 30, 2013; any and all applications claiming the benefit thereof including the right of priority; and any and all U.S. provisional applications that the foregoing U.S. Nonprovisional Application claims the benefit thereof including the right of priority, (the "Invention" or "Inventions").

WHEREAS, the Inventor acknowledges that any of my right, title, or interest in the Invention or Inventions aforementioned vest in Nyxoah SA, a company of the country of Belgium, having an office at 12 Rue Edouard Belin, B-1435 Mont-St-Guibert, Belgium ("Assignee"), by virtue of employment or otherwise.

WHEREAS, to the extent that any of Inventor's rights, title, and interest in the Invention or Inventions has not been transferred or assigned to Assignee by virtue of employment or otherwise, Inventor desires to assign to Assignee all of Inventor's rights, title, and interest in, to, or under the Invention or Inventions, and Assignee desires to accept such assignment.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged:

Inventor hereby sells, assigns and transfers and does hereby confirm any previous contribution, assignment, and transfer, unto Assignee and its successors, assigns, and legal representatives all of Inventor's rights, title, and interest in the Invention or Inventions, all of Inventor's rights, title, and interest in the Invention or Inventions being in the United States of America and all other countries and states of the world, and all the rights and privileges in said Invention or Inventions under any and all Letters Patent or any continuation, continuation-in-part, divisional, renewal, or substitute thereof, and any reissue or re-examination thereof that may be granted in the United States and in any country or state of the world for the Invention or Inventions (including, without limitation, all claims for past infringement and damages thereof, all proceeds thereof and the rights to sue for past, present and future infringements). I sell, assign, and transfer all of my right, title and interest in the Invention or Inventions as of the first filed patent application for the Invention or Inventions.

The Inventor authorizes Assignee to make application for such protection in its own name and maintain such protection in any and all countries foreign to the United States, and to invoke and claim for any application for patent or other form of protection for the Invention or Inventions, without further authorization from Inventor, any and all benefits, including the right of priority provided by any and all treaties, conventions, or agreements.

The Inventor hereby consents that a copy of this assignment shall be deemed a full legal and formal equivalent of any document that may be required in any country in proof of the right of Assignee to apply for patent or other form of protection

for the Invention or Inventions and to claim the aforesaid benefit of the right of priority.

The Inventor requests that any and all patents for the Invention or Inventions be issued to Assignee in the United States and in all countries foreign to the United States or to such nominees as Assignee may designate.
