<b>Assignors</b>	<b>Assignee</b>
Forwood C. Wiser III 942 Ridge Road Kingston, NJ 08852	Environmental Management Confederation, Inc. 5 Crescent Avenue, Bldg B-3 Rocky Hill, NJ 08553

Assignors are inventors of an invention titled

Angled Adsorbent Filter Media Design In Tangential Flow Applications  
described in the U.S. Patent Application No. 16/039,278 filed July 18, 2018,  
(the "Patent Application"). (If blank, Assignors permit the application number and filing  
date to be inserted by Assignee's representative after the signature date(s) below.)

Assignee desires to acquire all rights in and to the Patent Application and any  
patent that may be granted from the Patent Application.

Therefore, for valuable consideration, the receipt of which is acknowledged,  
Assignors hereby assign to Assignee 100% of their right, title, and interest in the invention  
and Patent Application (as well as such rights in any divisions, continuations in whole or  
part or substitute applications) to Assignee for the entire term of the issued Patent and any  
reissues or extensions that may be granted and for the entire terms of any and all foreign  
patents that may issue from foreign applications (as well as divisions, continuations in  
whole or part or substitute applications) filed claiming the benefit of, or related to, the  
Patent Application.

Assignors authorize the United States Patent and Trademark Office to issue any  
Patents resulting from the Patent Application to Assignee according to the percentage  
interest indicated in this assignment. The right, title and interest in the Patent Application is  
to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and  
exclusively as it would have been held and enjoyed by Assignors had this assignment not  
been made.

Assignors further agree to: (a) cooperate with Assignee in the prosecution of the Patent Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain any patent for the invention described in the Patent Application in any and all countries.
