- H. The closing date for this agreement shall be **31 December 2013, 23:59 hrs CET** (hereinafter the "**Closing Date**").
- I. Therefore the Parties enter into the following intellectual property transfer agreement (hereinafter the "**Agreement**"):

**1. SALE, PURCHASE AND TRANSFER OF INTELLECTUAL PROPERTY**

- 1.1. The Seller hereby sells, conveys, assigns and transfers and delivers to the Purchaser with effect on the Closing Date all "**Intellectual Property**" as listed and defined below and all rights related thereto as well as any rights or forms of protection having an equivalent or similar effect anywhere in the world, applications for such rights as well as user rights and exploitation rights in respect of such rights the holder of which is the Seller. For the avoidance of doubt this also includes all Intellectual Property the holder of which is the Seller under its former trade name "normed Medizintechnik-Vertriebs GmbH".
- 1.2. The Purchaser hereby accepts the transfer and sale of the Intellectual Property and all rights related thereto.
- 1.3. The Intellectual Property sold and transferred to the Purchaser pursuant to this Agreement shall, in particular, include the following assets:
  - 1.3.1. All patents and pending patent applications (collectively, "**Patents**"), utility models (*Gebrauchsmuster*) and pending utility model applications (collectively, "**Utility Models**") and registered and unregistered design rights (*Geschmacksmuster*) and pending design right applications (collectively, "**Design Rights**") owned by the Seller as listed in **Schedule 1** as well as all registered and unregistered

trademarks (*Marken*) and pending trademark applications (collectively, "Trademarks"), owned by the Seller as listed in **Schedule 2**. This includes the right to claim priority from these Patents, Utility Models, Design Rights and Trademarks and file further applications, claiming priority or not, such as in particular but not limited to, divisional applications, continuations and continuations-in-part. The Purchaser shall have the right to file such applications in the name of the Purchaser or have them assigned to the Purchaser.

- 1.3.2. All copyrights, exclusive and non-exclusive rights of use and exploitation in both published and unpublished works such as but not limited to technical drawings, advertising materials, product drawings and photographs, X-rays, surgical techniques, journal publications, copyright applications as far as protected under the respective copyright laws (collectively, "Copyrights") used and/or required to the conduct of the Seller's Business and/or owned by the Seller.
- 1.3.3. The internet domains listed in **Schedule 3** and all rights in internet web sites presently used under these respective domains by the Seller.

- 1.4. The rights to the Intellectual Property, in particular as described in Clause 1.3.1, shall include, but not be limited to, the rights in applications for intellectual property protection filed with any authority worldwide (hereinafter the "Applications") and protective title derived from such applications (hereinafter the "Title") and all rights and title thereto. The Purchaser shall be entitled to file Applications with any authority worldwide, whether they are tied to any already existing Application by priority claims or not, claim priority to any already existing or later filed Application, in its own name or have Applications or any Title derived therefrom assigned to the Purchaser.

The Seller assigns to the Purchaser all respective rights, in particular, but not limited to, all rights in Applications pending on the Closing Date and/or Title already granted or granted in future from such Applications, including, but not limited to, the right to claim priority to any such Applications in the name of the Purchaser, file in the name of the Purchaser or have assigned to the Purchaser, divisional applications, continuations, continuations-in-part, or any other application for intellectual property protection derived from said Applications.

The Seller also explicitly assigns to the Purchaser all rights granting licences to and in enforcing the Intellectual Property, which includes, but is not limited to, the right to sue for any past, present or future infringement, misappropriation or violation of any and all rights related to the Intellectual Property, and to claim, collect and sue for damages, injunction or other relief for past, present or future infringements of the Seller's Intellectual Property Rights, inclusive of rights derived from the Seller's now lapsed, abandoned or expired Intellectual Property.

- 1.5. For the avoidance of doubt, the Intellectual Property shall also include the types of Intellectual Property described in Clauses 1.3.1.-1.3.4., which are not explicitly named in the Agreement or the Schedules to this Agreement but are pending or in force in the name of the Seller and/or to which the Seller has the rights to have them assigned to the Seller and/or which have been claimed by the Seller and/or are otherwise owned by the Seller at the time of and including the Closing Date.
- 1.6. Where it is not possible under applicable laws to transfer the ownership in an Intellectual Property (e.g. Copyrights) it is the purpose of this Agreement to put the Purchaser in

a legal position which comes as close as possible to an ownership position in the Intellectual Property for the Purchaser. Therefore, the Parties are in agreement that where the ownership in an Intellectual Property cannot be transferred, the Seller grants to the Purchaser a perpetual, exclusive, worldwide, irrevocable, royalty free, locally and substantially unlimited, transferable, sublicensable and fully paid-up right to use the Intellectual Property in its original or in any modified form and in any known and – as of the conclusion of this Agreement – unknown way.
