ASSIGNMENT OF PATENT APPLICATION

WHEREAS, **Zachary T. Perlman**, Product Manager for Blue Chip Group, LLC ("Blue Chip Group") and residing at 690 SW 1st Court, #1009, Miami, Florida, 33130, USA (referred to herein as "Inventor"), has invented a new ornamental design for a **DISPENSER FOR PERSONAL CARE LIQUIDS** ("Invention"), for which a United States design patent application was filed on August 22, 2018 and assigned Application Serial No. 29/660,805 ("Application"); and

WHEREAS, Blue Chip Group, a limited liability company organized under the laws of the State of Florida and having a place of business at 3400 NW 113th Court, Miami, Florida, 33178, U.S.A. ("Assignee"), is desirous of acquiring the entire right, title, and interest in and to the Invention and the Application, including the right to sue for damages for all past infringement occurring prior to the execution date of this Assignment, and in and to any patents and/or registrations that may be granted therefor in the United States and in any and all foreign countries that are based in whole or in part on the Invention and/or the Application;

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Inventor has sold, assigned, and transferred, and by these presents does hereby sell, assign, and transfer, unto Assignee (a) the entire right, title, and interest in and to the Invention and the Application in the United States and its territorial possessions, and in any and all foreign countries; (b) the entire right, title, and interest in and to any and all patents and/or registrations which may be granted therefor in the United States and its territorial possessions, and in any and all foreign countries, that are based in whole or in part on the Invention and/or the Application; and (c) the entire right, title, and interest in and to all divisions, reissues, continuations, reexaminations, and extensions of the Application and any patent(s) and/or registration(s) resulting therefrom in the United States and its territorial possessions, and in any and all foreign countries.

Inventor hereby authorizes and request the United States Patent and Trademark Office and counterpart patent, intellectual property, and/or industrial property offices in any and all foreign countries to issue any and all patents and/or registrations resulting in whole or in part from the Invention and/or the Application (including all divisions, extensions, continuations, reissues, or reexaminations), when granted, to Assignee as the assignee of the entire right, title, and interest in and to same for the sole use and enjoyment of Assignee, its successors and assigns to the full end of the term for which any Letters Patent and/or registration may be granted, the same as they would have been held and enjoyed by me had this assignment not been made.

Further, Inventor agrees that he will, without charge to Assignee, but at its expense, communicate to Assignee or its representatives any facts known to him respecting the Invention and/or the Application, testify in any legal proceedings, sign all lawful papers, execute all division, continuation, substitution, renewal and reissue applications, execute all necessary assignment papers to cause any and all of said patents and/or registrations to be issued to Assignee, make all rightful oaths, and generally do everything necessary or desirable to aid Assignee, its successors and assigns, in obtaining and enforcing proper protection for the Invention in the United States and in all foreign countries.

Further, Inventor covenants with Assignee that the interest and property hereby conveyed is free from all prior assignment, grant, mortgage, license or other encumbrance.

Inventor authorizes Assignee or its representatives to insert or complete any information in this document needed to effect its recordation in the U.S. Patent and Trademark Office and/or in any foreign counterpart patent, intellectual property, and/or industrial property office.

Inventor and Assignee agree that this Assignment shall be governed by the laws of the State of Florida, United States of America.
