GENERAL ASSIGNMENT

I, the undersigned

DRACHMANN, Jens
Rosendalvej 42
DK-8260 Viby J
Denmark

(in the following called the assignor) who is joint inventor of

Title: Ultrasonic Flow Meter with Improved ADC arrangement

for which an international patent application was filed on

Date of filing: 8 July 2016

Application number: PCT/DK2016/050242

hereby assign all my rights to the invention to

Apator Militors ApS
Bautavej 1A, Hasle
DK-8210 Aarhus V
Denmark

(in the following called assignee) a limited company organised and existing under Danish law.

NOW THEREFORE, to all whom it may concern, be it known that, for good and valuable consideration, the receipt of which is hereby recognised, the assignor do hereby sell or has sold, assign or has assigned, and otherwise transfer or has transferred ALL my rights, title and interest in all countries of the world, including the United States of America to the invention, to the above-identified patent application and to any patent(s) and utility model(s) which may be issued therefore to the assignee, to any other patent and utility model application(s) for the invention, patent(s) and utility model(s) for the invention and to apply for and obtain patent(s) and utility model(s) for the invention, including any divisional and continuation patent application(s), the right to claim priority under the Paris Convention and any other multilateral and bilateral treaty from the above-identified patent application, the right to refrain from applying for patent(s) and utility model(s) and to abandon pending patent and utility model application(s) and issued patent(s) and utility model(s), also including the right of the assignee to assign and license these rights to a third person or legal entity.

The assignor hereby agrees to execute any assignment(s) and other documents required in connection with the prosecution of this and any above-mentioned patent and utility model application(s) as well as to perform any additional acts necessary to enable the assignee or its successors, legal representatives and assigns to enjoy the full rights of this assignment, including applying for a patent and utility model for the invention in all countries of the world, including the United States of America, and assigning the patent application, and any patent and utility model application(s) derived therefrom, and any patent(s) issuing thereon to the said assignee or its successors and assigns.

The assignor hereby grants assignee or its legal representatives the power to insert on this assignment any further identification, including but not limited to Application number, which may be necessary or desirable for recordation of this assignment.
