PATENT ASSIGNMENT

This Patent Assignment (this "**Assignment**") is made effective as of November 1, 2018 (the "**Effective Date**") between LG Electronics Inc., a South Korean corporation ("**Assignor**") and BlackBerry Limited, an Ontario, Canada corporation ("**Assignee**").

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignor hereby irrevocably sells, assigns, transfers, and conveys to Assignee all of Assignor's right, title, and interest in and to any and all of the following (collectively, the "**Patent Rights**"): (a) the patents and patent applications identified in the attached Schedule A, together with any patent issuing on any such patent application, as well as any rights of priority in or to any of the foregoing patents and patent applications; (b) all reissues, extensions, renewals, reexaminations, divisionals, substitutions, continuations, continuations-in-part, parents, conversions, continued examinations, continued prosecution applications, and domestic and foreign counterparts of any of the patents or patent applications described in clause 2(a) above, and any other patent and patent application throughout the world that claims priority to only the patents or patent applications described in clause 2(a) above; (c) each patent or patent application that is referenced by a terminal disclaimer filed in connection with any of the patents or patent applications identified in clause 2(a) or clause 2(b) above (each patent and patent application described in clauses 2(a) through and including clause 2(c), collectively, the "**Assigned Patents**"); (d) to the extent they exist, any and all rights to sue and causes of action (whether known or unknown or whether currently pending, filed, or otherwise) and other enforcement rights under, or on account of, any of the Assigned Patents, including any and all causes of action and other enforcement rights for damages, injunctive or other equitable relief, and any other remedies of any kind (in each case for past, current, and future infringement), and all rights to collect and receive damages, royalties and other payments under or on account of each of the Assigned Patents and/or inventions claimed in the Assigned Patents; and (e) the right to apply (or continue prosecution) in any and all countries of the world for patents, design patents, utility models, certificates of invention or other governmental grants for the Patent Rights, as well as the rights, if any, to revive any abandoned Patent Rights.

2. Assignor hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents, certificates of invention, utility models or other governmental grants or issuances that may be granted upon any of the Patent Rights in the name of Assignee, as the assignee to the entire interest therein.

3. Assignor hereby authorizes and requests the attorney or agent of record to insert on this Assignment any further identification that may be necessary or desirable in order to comply with the rules of the respective patent office or governmental agency in each jurisdiction for recordation or other official recognition.

4. The construction, validity, performance, and effect of this Assignment will be governed by the laws of New York without giving effect to principles of conflicts of laws. The

Parties consent to the exclusive jurisdiction of the federal and state courts in New York, NY to resolve any dispute, claim, or controversy arising from or relating to this Agreement or the breach or validity hereof.

5. This Assignment shall be binding upon and inure to the benefit of the parties and their respective successors and permitted assigns.

6. Any rule of construction to the effect that ambiguities are to be resolved against the drafting party will not be applied in the construction or interpretation of this Assignment. The words "include," "including," and variations thereof will be deemed to be followed by the words "without limitation." The use of "or" will not be deemed to be exclusive. This Assignment may be executed in counterparts, each of which when executed will be deemed to be an original but all of which taken together will constitute one and the same agreement.
