This Assignment Form is to be used for the assignment of the invention or other intellectual property rights to a patent attorney or agent.

FORM 110 (8-2007)

INDIVIDUAL ASSIGNMENT AND INVENTOR'S DECLARATION

(with Priority Rights)

I/we verily believe I am/we are the original, firm and sole/joint inventor(s) of the subject matter which is embraced by and for which a patent is sought on the invention entitled: **METHOD FOR DISSOLUTION OF POLYMERIZED SOH.**

which invention was made and invented by me/us out of and in the course of my/our employment with my/our respective employer(s) as stated below my/our name(s). I/we acknowledge that I/we hold the invention and all patent and other rights and powers obtainable or exercisable in respect thereof in trust for our respective employers. As trustee(s), and for good and valuable consideration and/or the remuneration received for my/our work, I/we sell, assign and transfer unto:

ANGUS Chemical Company
1500 East Lake Cook Road
Buffalo Grove, Illinois 60089

an entity organized and existing under the laws of the state of Delaware (hereinafter referred to as the "Assignee"), my/our entire right, title and interest throughout the world, in and to the invention and all rights and powers to make applications, including provisional applications when permitted by law, for Letters Patent in its own name, or in the name of its designee (or nominee(s)), and all rights and powers to file any corresponding or equivalent applications in any and all countries, including all rights to claim priority under all United States domestic laws, International Convention(s) and Treaties in the name of Assignee, and do hereby authorize Assignee or its designee to insert here the Priority Number, Filing Date, and Filing Country

Priority Number	Filing Date	Filing Country
62/066,501	October 21, 2014	United States of America

of the application, on which the claim for priority will be based, and in and to any Letters Patent that may be issued for the invention in any and all countries. I/we do hereby agree to assist Assignee in the prosecution of the application(s) and in any interference, conflict, opposition or litigation which may arise involving the invention or the patent or patents thereon, and to execute for any and all countries any document relating to applications derived from, corresponding to or equivalent to the above identified application as Assignee may request.

I/we authorize Assignee or its designee to translate this Assignment into all languages necessary; and we request that any such Letters Patent be issued to Assignee; and consent to the recording of this Assignment, or a Notarial True Copy thereof, being under covenant not only that I/we have full power to make the same, but also that such assigned rights are not encumbered by any grant, license, or other right heretofore given.

Subscribed and Declared by me/us:

INTELLECTUAL PROPERTY ASSIGNMENT

THIS INTELLECTUAL PROPERTY ASSIGNMENT (this "Assignment") is dated as of November 11, 2014 and entered into by and between ANGUS Chemical Company, a corporation organized under the laws of Delaware, ANGUS Chemie GmbH, a German limited liability company (collectively, "Assignors"), and Dow Global Technologies LLC, a limited liability company organized under the laws of Delaware ("Assignee").

WHEREAS, Assignors desire to assign all right, title and interest in and to the Assigned Intellectual Property (as defined below) and Assignee desires to acquire all of Assignors' right, title and interest in and to the Assigned Intellectual Property.

NOW, THEREFORE, in consideration of the foregoing, the mutual covenants set forth herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Assignment. Effective as of the date hereof, Assignors, on behalf of themselves and their Affiliates, hereby sell, assign, transfer and convey to Assignee, and Assignee hereby purchases and accepts from Assignors and their Affiliates, all of Assignors' and Assignors' Affiliates' right, title and interest in and to the following (collectively, the "Assigned Intellectual Property"):

(a) the patents and patent applications specifically listed in Exhibit A to this Assignment and the following properties and rights with respect to all patents and patent applications so listed in Exhibit A:

(i) the inventions claimed in the patents or applications;

(ii) any patents in the United States and anywhere else in the world and patent applications that have been or may be granted or filed, respectively, with respect to those inventions, including all foreign patents that may claim priority based on and correspond to the patents listed in Exhibit A;

(iii) all divisions, renewals, reissues, continuations, extensions, continuations-in-part or foreign equivalents of any of the foregoing patents or applications;

(b) [REDACTED]

(c) [REDACTED]

(d) all rights to make application in the future to register or otherwise obtain legal protection for any of the foregoing;

(e) all rights of priority under national laws and international conventions with respect to any of the foregoing;

(f) all income, royalties, damages and payments now or hereafter due or payable in respect to any of the foregoing, including unpaid damages and payments for past, present and future infringement;

(g) all causes of action (either in law or equity), and the right to sue, counterclaim and recover for infringement with respect to any of the foregoing; and

(h) all other rights and privileges corresponding thereto.

2. Purchase Price. As consideration for the Assigned Intellectual Property, Assignee shall pay to Assignor an amount equal to [REDACTED].

3. Assumption. Effective as of the date hereof, Assignee hereby assumes and agrees to pay, perform and discharge when due, all obligations and liabilities with respect to the Assigned Intellectual Property.

4. Costs and Actions. Assignee shall be responsible for all costs and actions for transfer of patents and recordation of patent assignments.

5. Further Assurances. Assignor further agrees that, without further consideration, it shall cause to be performed such other lawful acts, and to be executed such further assignments and other lawful documents and instruments, as Assignee may, from time to time, reasonably request to effect fully this Assignment and to permit Assignee to be duly recorded as the registered owner of the Assigned Intellectual Property.

6. Governing Law. This Assignment shall be governed exclusively by and construed and enforced exclusively in accordance with the internal laws of the State of Delaware without giving effect to the principles of conflicts of law thereof.

7. Counterparts. This Agreement may be executed in any number of counterparts (including by .pdf file exchanged via email or other electronic transmission), each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

8. Successors and Assigns. This Assignment shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

9. Headings. The headings preceding the text of Sections included in this Assignment and the headings to Exhibits attached to this Assignment are for convenience only and shall not be deemed part of this Assignment or be given any effect in interpreting this Assignment.

INDIVIDUAL ASSIGNMENT AND INVENTOR'S DECLARATION

(with Priority Rights)

I/we verily believe I am/we are the original, first and sole/joint inventor(s) of the subject matter which is embraced by and for which a patent is sought on the invention entitled: **METHOD FOR DISSOLUTION OF POLYMERIZED SOIL**

which invention was made and invented by me/us out of and in the course of my/our employment with my/our respective employers as stated below my/our name(s). I/we acknowledge that I/we hold the invention and all patent and other rights and powers obtainable or exercisable in respect thereof in trust for our respective employers. As trustee(s), and for good and valuable consideration and/or the remuneration received for my/our work, I/we sell, assign and transfer unto:

Dow Global Technologies LLC
2040 Dow Center
Midland, Michigan 48674

an entity organized and existing under the laws of the state of Delaware (hereinafter referred to as the "Assignee"), my/our entire right, title and interest throughout the world, in and to the invention and all rights and powers to make applications, including provisional applications when permitted by law, for Letters Patent in its own name, or in the name of its designee (or nominee(s)); and all rights and powers to file any corresponding or equivalent applications in any and all countries, including all rights to claim priority under all United States domestic laws, International Convention(s) and Treaties in the name of Assignee, and do hereby authorize Assignee or its designee to insert here the Priority Number, Filing Date, and Filing Country
