PATENT ASSIGNMENT AGREEMENT

This **PATENT ASSIGNMENT AGREEMENT** (the "**Agreement**") is made and effective as of December 14, 2018, by and between Hydra Biosciences, Inc., a Delaware corporation ("**Seller**"), and Eli Lilly and Company, an Indiana corporation ("**Buyer**").

WHEREAS, Seller is an owner of the patents, patent applications, patent disclosures and related patent rights listed on **Schedule 1** (collectively, the "**Patents**"); and

WHEREAS, Seller desires to sell, and Buyer desires to acquire, all of Seller's right, title and interest in and to the Patents pursuant to that certain Asset Purchase Agreement by and among Seller and Buyer dated as of the date hereof (the "**Asset Purchase Agreement**").

NOW, THEREFORE, in consideration of entering into the Asset Purchase Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller hereby sells, assigns, set overs and transfers to Buyer, its successors and assigns all of Seller's entire rights, title and interests in and to the Patents, and agrees to sell, assign, set over and transfer to Buyer, its successors and assigns all of Seller's entire right, title and interest in and to the Patents that are completed or come into existence hereafter, including any non-provisionals, continuations, continuations-in-part, divisionals, reissues, re-examinations, substitutions, and extensions thereof, and any and all patents of the United States and foreign countries that may issue therefrom, and all rights of priority resulting from the filing in the United States of the Patents, and any and all applications for patent and patents issuing therefrom in any and all countries of the world, including all non-provisionals, continuations, continuations-in-part, divisionals, reissues, re-examinations, substitutions, and extensions thereof, and all rights of priority resulting from the filing in the United States of the respective applications for said Patents identified above, the same to be held and enjoyed by Buyer for its own use and enjoyment, and for the use and enjoyment of its successors, assigns and other legal representatives, to the end of the term or terms for which the Patents are or may be granted or reissued as fully and entirely as the same would have been held and enjoyed by the Seller if this Agreement and sale had not been made; together with all claims for damages by reason of past infringements of the Patents including without limitation provisional rights thereto with the right to sue for and collect the same for its own use and benefit, and for the use and on behalf of its successors, assigns and other legal representatives.

Seller agrees that, on request it will sign all lawful papers in connection with all Patents and, with respect thereto, all non-provisionals, continuations, continuations-in-part, divisionals, reissues, re-examinations, substitutions, and extensions thereof, and any and all patents of the United States and foreign countries that may issue therefrom, make all rightful oaths and generally do everything reasonably requested by Buyer to aid Buyer, its successors, assigns and nominees to obtain, maintain, and enforce patent protection in any country for the inventions set forth in the Patents.

In the event of any conflict between this Agreement and the Asset Purchase Agreement, the Asset Purchase Agreement shall control. Nothing in this Agreement shall be deemed to amend or modify in any way any of the terms and conditions of the Asset Purchase Agreement or any rights or obligations of the parties thereto.

IN WITNESS WHEREOF, the undersigned has caused this Patent Assignment Agreement to be executed and delivered as of the date first above written.
