WHEREAS, Buyer has acquired all of the Seller Entities' right, title and interest in and to the Assigned Patent Properties for the good and valuable consideration set forth in that Asset Purchase Agreement by and among the Seller Entities and Buyer dated February 5, 2016 (the "Asset Purchase Agreement");

WHEREAS, capitalized terms used but not otherwise defined herein shall have the meanings given to them in the Asset Purchase Agreement;

NOW, THEREFORE, in consideration of good and valuable consideration acknowledged by the Seller Entities to have been received from Buyer:

1. The Seller Entities hereby sell, assign, transfer and convey unto Buyer, all of their respective rights, title and interest in and to the Purchased IP, including without limitation the Assigned Patent Properties and all inventions therein set forth and described, including the right to claim priority therefrom, the eventual letters patent, and all continuations, divisionals, continuations-in-part, reexaminations, substitutions, foreign counterparts, reissues, renewals and extensions of said Assigned Patent Properties together with the right to sue and recover for any past infringement of any of the Assigned Patent Properties.

In the event that Buyer is unable for any reason to secure a Seller Entity's signature to any document required to apply for or execute any patent applications or patents (including improvements, renewals, extensions, continuations, divisions or continuations in part thereof) or memorializing the assignments hereunder, the Seller Entities hereby irrevocably designate and appoint Buyer and its duly authorized officers and agents as their agent and attorney-in-fact to act for and in their behalf, and instead of the Seller Entities, to execute and file any such applications and to do all other lawfully permitted acts to further the perfection, prosecution and issuance of patents or other rights
