## ACKNOWLEDGMENT OF ASSIGNMENT OF INTELLECTUAL PROPERTY

This is an Acknowledgment of Assignment of Intellectual Property ("Assignment") effective as of November 8, 2016, by NESTIS SAS, a French joint stock company ("Assignor"), to Boston Scientific International B.V., a Dutch limited liability company ("Assignee").

### Background

WHEREAS, pursuant to a dissolution without liquidation of Assignor into its sole shareholder, Assignee, that became legally effective as of the date hereof, all of Assignor's assets and liabilities, including Assignor's interest in the intellectual property rights defined below, were transferred by operation of law to Assignee; and

WHEREAS, in connection with the foregoing, this Assignment serves to document Assignor's transfer of such intellectual property rights.

NOW, THEREFORE, in consideration of and subject to each of the covenants, terms and conditions hereinafter set forth, Assignor hereby agrees as follows:

### ARTICLE I – DEFINITIONS.

Section 1.1 "Intellectual Property Rights" means any intellectual property of any type or nature in any jurisdiction throughout the world, including:

- (a) rights in patents, patent applications and patentable subject matter, whether or not the subject of an application, including, but not limited to, the patents and patent applications listed on Schedule A hereto, together with the invention(s) disclosed therein, including all issuances, reissues, extensions, reexaminations, renewals, divisions, substitutions, continuations or continuations-in-part of such patents, all patents which claim priority to said patents and all associated rights under the International Convention;
- (b) rights in trademarks, service marks, trade names, trade dress, and other designators of origin, together with the goodwill of the business connected with the use thereof and symbolized thereby;
- (c) rights in copyrightable subject matter or protectable designs, including, but not limited to, copyrights and copyright applications;
- (d) trade secrets, know-how, formulae, methods, techniques, and processes;
- (e) computer programs or data in computerized form, whether in object code, source code or other form; and
- (f) all other intellectual and industrial property rights of every kind and nature and however designated, whether arising by operation of law, contract, license or otherwise, including Assignor's rights that relate to core technologies, developed technologies or purchased research and development.

Section 1.2 "NESTIS Intellectual Property Rights" means Assignor's entire right, title and interest in and to Intellectual Property Rights.

Section 1.3 "NESTIS Licensed-In Intellectual Property Rights" means Assignor's entire right, title and interest in and to Intellectual Property Rights that are owned by a third party and licensed or granted to Assignor.

## **ARTICLE II- ASSIGNMENT OF INTELLECTUAL PROPERTY RIGHTS.**

Section 2.1 Assignment. Assignor hereby acknowledges the assignment, transfer and conveyance unto Assignee of the following as a consequence of the dissolution without liquidation of the Assignor:

- (a) the NESTIS Intellectual Property Rights;
- (b) the NESTIS Licensed-In Intellectual Property Rights (but solely to the extent transfer is permitted by applicable agreements); and
- (c) all benefits, privileges, causes of action, common law rights, and remedies relating to the foregoing throughout the world, including, without limitation, all of Assignor's rights to: (i) apply for and maintain all registrations, renewals and/or extensions thereof, (ii) bring actions and recover damages for past, present and future infringement or other violation thereof, and (iii) grant licenses or other interests therein.

Section 2.2 Recordation and Cooperation in Transfer. Assignor hereby authorizes the Commissioner for Patents and the Commissioner for Trademarks in the United States Patent and Trademark Office, the Register of Copyrights in the United States Copyright Office and any officials of corresponding entities or agencies in any applicable jurisdictions throughout the world to record and register this Assignment. Assignor hereby covenants and agrees to cooperate with Assignee whereby the latter may enjoy to the fullest extent the right, title and interest conveyed. Such cooperation shall include prompt execution of all papers prepared at the expense of Assignee which are deemed necessary or desirable by Assignee to perfect in it the right, title and interest herein conveyed. Nothing herein shall effect the transfer or assignment of any agreement or other NESTIS Intellectual Property Rights to the extent that such transfer or assignment would constitute a material breach of such agreement or cause loss of such NESTIS Intellectual Property Rights, but it is intended that Assignee, to the extent possible, be placed in the same position economically as if such agreement or other NESTIS Intellectual Property had been transferred as contemplated.

## **ARTICLE III- MISCELLANEOUS.**

Section 3.1 Representations and Warranties. Assignor makes no representations or warranties concerning the rights transferred pursuant to the dissolution without liquidation and referred to under this Assignment.

Section 3.2 Binding Effect. The terms, covenants and provisions of this Assignment shall inure to the benefit of Assignee, its successors and assigns, and shall be binding upon the Assignor, its successors, assigns and/or other legal representatives.

IN WITNESS WHEREOF, Assignor has executed and delivered this instrument effective as of the date first written above.

NESTIS SAS
