WHEREAS, Assignor is the record owner of the issued patents set forth on Schedule 1 attached hereto (collectively, the "Assigned Patents");

WHEREAS, a Certificate of Dissolution of the Assignor was filed with Secretary of State of the State of California on December 31, 2018, representing the decision of the shareholders of the Assignor to dissolve Assignor (the "Dissolution");

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor and Assignees agree as follows:

1. Assignment. Assignor hereby irrevocably assigns, transfers, and conveys to Assignees its entire right, title, and interest in and to the Assigned Patents, including, without limitation, all foreign counterparts with respect thereto, the right of priority to file and prosecute corresponding applications in any and all jurisdictions throughout the world and the rights to all patents which may be granted therefrom, and the rights to any divisionals, renewals, continuations, continuations-in-part, reissues, reexaminations, and extensions with respect thereto. The foregoing assignment includes all claims, actions, rights, and demands to the extent arising from the Assigned Patents, whether choate or inchoate, known or unknown, contingent or non-contingent, including, without limitation, causes of action to sue for past, current, or future infringement, dilution, misappropriation, or violation thereof and other enforcement rights, including the right to collect and retain all proceeds and damages therefrom.

2. Recordation. Assignor hereby authorizes and requests the Commissioner for Patents of the United States Patent and Trademark Office, and the corresponding entities or agencies in any applicable foreign countries, to record Assignees as the assignees and owners of the Assigned Patents registered in the corresponding jurisdiction.

3. General. This Assignment may be executed in counterparts, each of which will be deemed an original and all of which, when taken together, will constitute one and the same Assignment.
