ASSIGNMENT

WHEREAS, MeiraGTx Neurosciences Inc., a Delaware corporation, hereinafter referred to as "Assignor", has been assigned the entire right, title and interest of the inventors in and to United States Patent No.: 8,017,385, entitled, "USE OF APOPTOSIS INHIBITING COMPOUNDS IN DEGENERATIVE NEUROLOGICAL DISORDERS", granted September 13, 2011, by virtue of a Certificate of Merger confirming the merger of Vector Neurosciences Inc. with and into VN Acquisition 2, Inc., and a change of name from VN Acquisition 2, Inc. to MeiraGTx Neurosciences Inc., filed herewith; and

WHEREAS, MeiraGTx UK II Limited, having a place of business at 92 Britannia Walk London N1 7NQ and who, together with its successors and assigns, is hereinafter called "Assignee", is desirous of acquiring the title, rights, benefits, and privileges hereinafter recited;

NOW, THEREFORE, for good and valuable consideration furnished by Assignee to us, receipt and sufficiency of which we hereby acknowledge, MeiraGTx Neurosciences Inc., hereby, without reservations:

1. Assign, transfer, and convey to Assignee our entire right, title, and interest in and to said inventions, discoveries and improvements, said Letters Patent, any and all other applications for Letters Patent on said inventions, discoveries and improvements, in any and all countries, including all provisional, non-provisional, divisional, renewals, substitute, continuation, continuation-in-part, and Convention and International Convention applications based in whole or in part upon said inventions, discoveries or improvements, upon said applications, and any and all Letters Patent, reissues, and extensions of Letters Patent granted for said inventions, discoveries and improvements, or upon said applications, and every priority right that is or may be predicated upon or arise from said inventions, said discoveries, said improvements, said applications, and said Letters Patent.

2. Authorize Assignee to file patent applications in any or all countries for any or all of said inventions, discoveries or improvements in our name or in the name of Assignee or otherwise as Assignee may deem advisable, under an International Convention or otherwise.

3. Authorize and request the Commissioner of Patents and Trademarks of the United States of America and the empowered officials of all other governments to issue or transfer all said Letters Patent to Assignee, as assignee of the entire right, title, and interest therein or otherwise as Assignee may direct.

4. Warrant that we have not conveyed to others any right, title, or interest in said inventions, discoveries, improvements, applications, or patents or any license to use the same or to make, use, or sell anything embodying or utilizing any of said inventions, discoveries or

improvements; that we have good right to assign the same to Assignee without encumbrance; and that we are aware of no claim to the contrary.

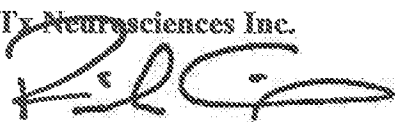

5. Bind our heirs, legal representatives, and assigns, as well as ourselves to do, upon Assignee's request and at Assignee's expense, but without additional consideration to us or them, all acts reasonably serving to assure that the said inventions, discoveries and improvements, the said patent applications, and the said Letters Patent shall be held and enjoyed by Assignee as fully and entirely as the same could have been held and enjoyed by us, our heirs, legal representatives, and assigns if this assignment had not been made; and particularly to execute and deliver to Assignee all lawful application documents including petitions, specifications, and oaths, and all assignments, disclaimers, and lawful affidavits in form and substance as may be requested by Assignee; to communicate to Assignee all facts known to us relating to said inventions, discoveries and improvements or the history thereof; to furnish Assignee with any and all documents, photographs, models, samples, and other physical exhibits in our control or in the control of our heirs, legal representatives, or assigns which may be useful for establishing the facts of our conceptions, disclosures, and reduction to practice of said inventions, discoveries and improvements; and to testify to the same in any interference, arbitration, or litigation.
