WHEREAS, ASSIGNORS have invented certain subject matter, including one or more inventions, disclosed in an application for Letters Patent of the United States of America, entitled "MULTI-ARRAY ANTENNA," and filed on February 21, 2014 and accorded U.S. Application No. 14/186,524 (the "APPLICATION");

WHEREAS, the APPLICATION has issued as U.S. Patent No. 9,438,278 on September 6, 2016 (the "PATENT"), which APPLICATION, inventions described in the APPLICATION, and the PATENT, together with related experimental data, trade secret, and other know-how is referred to hereinafter as the INVENTION;

WHEREAS, the present Assignment is confirmative of a previous assignment executed on February 24, 2014 conveying the same rights, privileges, and obligations, but which omitted certain language due to a clerical error;

ASSIGNORS further have assigned and hereby assign to ASSIGNEE all rights to claim priority to the APPLICATION under any International Convention, including the Paris Convention for the Protection of Industrial Property and all rights to be granted patents in any Paris Convention Treaty contracting state arising from the APPLICATION.

ASSIGNORS authorize and request the Commissioner for Patents and Trademarks of the United States, and any Official of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to issue the same to said ASSIGNEE, its successors and assigns, in accordance with the terms of this Assignment; and
