UNITED STATES PATENT ASSIGNMENT

For valuable and sufficient consideration from Provisur Technologies, Inc. (hereinafter referred to as "Assignee"), a Delaware corporation having its principal place of business at 222 North LaSalle Street, Suite 720, Chicago, IL 60601, receipt of such consideration being hereby acknowledged by Provisur (Whitewater) LLC (hereinafter referred to as "Assignor"), a Wisconsin limited liability company having its principal place of business at 222 North LaSalle Street, Suite 720, Chicago, IL 60601, Assignor hereby sells, assigns, and conveys unto Assignee, its successors and assigns, its entire right, title and interest:

(1) in and to inventions, for which U.S. patent applications and U.S. patents have been filed or granted, respectively, and listed on Schedule "C" attached hereto; and

(2) in and to said United States Patent Applications and in and to all other patent applications now or hereafter filed in the United States (including divisionals, continuations, reexaminations, and reissue applications, and legal equivalents thereof) based upon said inventions, and in and to said patents granted thereon or issued therefrom, and all other patents now or hereafter granted thereon or issued therefrom, including reissues or the like thereof, if any, to the full end of the term or terms for which said patent or patents may be granted or issued.

This assignment expressly includes the complete right to enforce the inventions described herein, including all rights of action, injunctive and equitable relief, damages for all past, present, and future infringement, and the recovery of all past, present, and future damages, including, but not limited to, reasonable royalties and lost profits, for any violation of the invention's United States patent or patent application rights. Assignor does not retain any right to any recoveries for infringement or to sue in its own name with regard to the inventions. This assignment expressly grants Assignee all United States patent rights as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment not been made.

This assignment relates only to United States patent rights and does not transfer foreign patent rights.

Assignor hereby further agrees that it shall, upon demand of Assignee, its successors or assigns, and without further consideration to Assignor, execute any and all papers that may be necessary, or deemed by Assignee, its successors or assigns, to be necessary, to be a complete fulfillment of the intent and purposes of this assignment, it being understood that any expense incident to the execution of such papers shall be paid by Assignee, its successors and assigns, and not by Assignor.

Assignor hereby further agrees and authorizes the Commissioner of Patents and Trademarks of the United States to issue any and all above-identified patents to Assignee.
