PATENT ASSIGNMENT

For good, valuable, and legally sufficient consideration, the receipt, adequacy and legal sufficiency of which is hereby acknowledged, Osseon LLC, a Delaware limited liability company ("Assignor"), hereby sells, assigns, transfers and conveys to Merit Medical Systems, Inc., a Utah corporation ("Assignee"), any and all of Assignor's entire right, title and interest, including the right to sue for past infringement and to collect for all past, present and future damages, in the United States of America (as defined in 35 U.S.C. § 100) and throughout the world,

(a) in, to and under the inventions identified by the Serial Numbers and Patent Numbers, if available, set forth on the attached Exhibit A, which is incorporated by this reference, for which the United States Patent and Trademark Office issued patents or for which a patent application has been filed, and

(b) in any and all applications that claim the benefit of the patents listed on the attached Exhibit A, including non-provisional applications, continuing (continuation, divisional, or continuation-in-part) applications, reissues, extensions, renewals and reexaminations of the patent application or letters patent therefore listed on the attached Exhibit A, to the full extent of the term or terms for which letters patents issue, and

(c) in any and all inventions described in the patents or patent applications described herein, and in any and all forms of intellectual and industrial property protection derivable from such patents or patent applications, and that are derivable from any and all continuing patents, applications, reissues, extensions, renewals and reexaminations of such patents or patent applications, including, without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefore;

all such rights, title and interest to be held and enjoyed by the above-named Assignee, its successors, legal representatives and assigns to the same extent as all such rights, title and interest would have been held and enjoyed by the Assignor had this sales assignment, transfer and conveyance not been made.

Assignor agrees to execute all papers necessary in connection with the application(s) and any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue, reexamination or corresponding application(s) thereof and also to execute separate assignments in connection with such application(s) as Assignee may deem necessary or expedient.

Assignor agrees to execute all papers necessary in connection with any interference or patent enforcement action (judicial or otherwise) related to the application(s) or any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue or reexamination application(s) thereof and to cooperate with Assignee in every way possible in obtaining evidence and going forward with such interference or patent enforcement action.
