ASSIGNMENT

WHEREAS, We, **Declan Walsh**, with a post office address of Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland and **Paul Prendergast**, with a post office address of Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland and **Daniel Buck**, with a post office address of Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland and **Trevor Kent**, with a post office address of Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland, and **Niall Thompson**, with a post office address of Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland, hereinafter generally referred to individually as "ASSIGNOR" or collectively as "ASSIGNORS," have invented certain new and useful inventions entitled:

"Breath Actuated Inhaler"

that are described in U.S. Patent Application No. 16/258,330 filed January 25, 2019 and Great Britain Application No. 1801309.4 filed January 26, 2018 ("Inventions") naming the above ASSIGNORS as inventors.

WHEREAS, **Norton (Waterford) Limited**, a corporation having a place of business at Unit 301, IDA Industrial Park, Cork Road, Waterford, Republic of Ireland hereinafter generally referred to as "ASSIGNEE," is desirous of acquiring and/or confirming the acquisition of the Inventions.

NOW, THEREFORE, in consideration of good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged and intending to be legally bound hereby, we, ASSIGNORS, have assigned and/or by these presents do sell, assign, transfer and convey unto ASSIGNEE, the whole and entire right, title and interest in and to:

all Inventions;

the above patent application and any and all United States and foreign patent applications disclosing one or more of the Inventions including, without limitation, applications for patents including provisionals, non-provisionals, divisions, continuations, continuations-in-part, requests for continued examinations, utility models, PCT applications and designs and any other related United States and foreign applications and equivalents thereof ("Applications"), along with the right to claim priority to the Applications under any treaty relating thereto;

all United States and foreign patents, utility models, inventor's certificates and designs and all equivalents thereof which may be granted for the Inventions or Applications, including extensions, renewals, reissues and reexamination certificates thereof ("Patents"); and

all rights to sue for and collect damages resulting from past, present and future infringement of all Patents.

The Inventions, Applications and Patents to be held and enjoyed by ASSIGNEE, for ASSIGNEE's own use and benefit, and for ASSIGNEE's legal representatives and assigns to the full end of the term or terms of said granted or to be granted Patents, as fully and entirely as the same would have been held by ASSIGNORS had this assignment and sale not been made; and for the aforesaid consideration ASSIGNORS hereby covenant, agree and undertake to execute, whenever requested by the above-named ASSIGNEE, all patent applications, assignments, lawful oaths and any other papers which ASSIGNEE may deem necessary or desirable for securing to ASSIGNEE or for maintaining for ASSIGNEE all the Inventions, Applications and Patents hereby assigned or agreed to be assigned; all without further compensation to the undersigned ASSIGNORS.

It is agreed that ASSIGNORS shall be legally bound, upon request and at the expense of ASSIGNEE or its successors or assigns or a legal representative thereof, to supply all information and evidence of which the undersigned has knowledge or possession, relating to the making and practicing of the Inventions, and to testify in any legal proceeding relating thereto.

Each ASSIGNOR hereby represents and warrants that he/she has full right, power and authority to assign their entire right, title, and interest in the Patents, Applications, and Inventions, and to consummate the assignment contemplated herein. Each ASSIGNOR also represents and warrants that he/she has full right, power, and authority to enter into, execute, and deliver this Assignment, the execution and delivery of which have been duly authorized by all necessary action on the part of ASSIGNORS, and no other authorization or proceedings on the part of ASSIGNORS are necessary to authorize this Assignment. This Assignment has been duly executed and delivered and constitutes a valid, binding and enforceable assignment of the entire right, title, and interest in the Patents and Applications, and Inventions disclosed therein.

ASSIGNORS hereby warrant that no assignment, sale, agreement, or encumbrance has been or will be made or entered into which would conflict with this Assignment.
