- All worldwide rights, title, and interest in the APPLICATION(S) and the PATENT(S), in all current or future applications claiming priority to the APPLICATION(S) or the PATENT(S), including all provisional, utility, design, divisional, continuation, continuation-in-part, substitute, renewal, reissue, and all other applications related thereto in the United States or anywhere else in the world, and in all granted patents (including reissued and re-examined) for any of these applications and for any subsequent provisional, non-provisional, or foreign applications claiming priority to these applications, together with all rights to recover damages for infringement thereof, including damages for infringement of provisional rights.

The INVENTOR(S) hereby authorize and request the Commissioner of Patents to issue any and all United States Patents resulting from said application or any divisional, continuation, substitute, renewal, re-examination, or reissue thereof to the ASSIGNEE.

The INVENTOR(S) hereby agree to carry out the intent of this agreement without further remuneration, including agreement:

- to execute all papers and documents and, entirely at the ASSIGNEE's expense, perform any acts which are reasonably necessary in connection with the prosecution of said application, as well as any derivative applications thereof, foreign applications based thereon, and/or the enforcement of patents, including patents resulting from such applications, including any oaths, assignments, powers of attorney, applications, or any other papers required for prosecution of applications;
- to provide reasonable assistance and cooperation in connection with the assertion of any rights granted to ASSIGNEE under this agreement;
- to communicate to ASSIGNEE, its agents, attorneys, or those of ASSIGNEE's successors or assigns all known facts relating to the SUBJECT MATTER;
- to generally do all lawful acts that ASSIGNEE, successor, or assign, shall consider desirable for securing, maintaining, and enforcing worldwide patent protection for the SUBJECT MATTER and for vesting in ASSIGNEE the rights, titles, and interests conveyed under this agreement.

INVENTOR(S) agree that the terms, covenants, and conditions of this assignment shall inure to the benefit of the ASSIGNEE, its successors, assigns, and other legal representatives, and shall be binding upon the inventor, as well as the inventor's heirs, legal representatives, and assigns;

INVENTOR(S) warrant and represent that I have not entered and will not enter into any assignment, contract, or understanding that conflicts with this assignment.

This Assignment may be executed in one or more counterparts, each of which shall be deemed an original and all of which may be taken together as one and the same document.

INVENTOR(S) authorize and request the attorney/agent to insert any application number or further identification for the above APPLICATION(S) if not filed as of the time of executing this assignment in order to assist with recordation of this assignment.

INVENTOR(S) hereby acknowledges that any willful false statement made in this declaration is punishable under 18 U.S.C. § 1001 by fine or imprisonment not more than (5) years, or both.
