CONFIRMATORY PATENT ASSIGNMENT

This confirmatory patent assignment (the "Assignment") is effective as of 30 April 2016 and confirms the prior assignment by and between **Imerys Minerals Limited** (the "Assignor") and **Fiberlean™ Technologies Limited** (the "Assignee"), for recordation purposes in the United States Patent and Trademark Office and any other applicable governmental entity or registrar (including in any applicable foreign or international office or register) to record the Assignee as the assignee of the Assignor's entire right, title and interest in, to, and under the patent applications and patents listed on Schedule 1 hereto.

WITNESSETH

WHEREAS, the Assignor, which was the owner of certain patent applications and patents ("Patents"), pursuant to an Asset Purchase Agreement dated 30 April 2016, by and among the Assignor, Mircal SA, Omya Holding AG and the Assignee (the "Asset Purchase Agreement") and an assignment of Intellectual Property Rights (which definition for the avoidance of doubt includes the Patents) between the Assignor and the Assignee dated 30 April 2016 (the "IPR Assignment") assigned the Patents to the Assignee, including without limitation all renewals, related continuations, continuations-in-part, divisional, reissues, reexaminations, substitutions and extensions thereof (the "Assigned Patents"), and goodwill therein.

NOW, THEREFORE, pursuant to and for the consideration set out in the Asset Purchase Agreement, the receipt and sufficiency of which is hereby acknowledged, the Assignor, hereby confirms the sale, assignment, transfer and delivery to the Assignee, of all right, title and interest in, to and under the Assigned Patents and all other rights associated therewith, including, without limitation:

(i) the absolute entitlement to any registrations granted pursuant to any of the patent applications comprised in the Assigned Patents;

(ii) all benefits, privileges, causes of action and remedies relating thereto throughout the world, including without limitation, all of Assignor's rights to: (a) apply for and maintain registrations, renewals and/or extensions thereof; (b) claim priority under United States law, European law or International convention; and (c) grant licenses or other interests therein; and

(iii) the right to bring, make, oppose, defend or appeal proceedings, claims or actions, and obtain relief and to retain any damages recovered, in respect of any infringement, or any other cause of action arising from ownership, of any of the Assigned Patents whether occurring before, on or after the date of this Assignment.

(collectively, the "Assigned Rights"), and the Assignee hereby confirms the acceptance of the foregoing assignment of the Assigned Patents, including, without limitation, the Assigned Rights.

The terms of the Asset Purchase Agreement are incorporated herein by reference and capitalized terms used herein and not otherwise defined shall have the meaning ascribed thereto in the Asset Purchase Agreement.

Nothing in this Assignment shall limit, expand or otherwise affect any of the representations, warranties or covenants contained in the Asset Purchase Agreement and IPR Assignment. To the extent any term or provision herein is inconsistent with the Asset Purchase Agreement and/or the IPR Assignment, the terms and provisions of the Asset Purchase Agreement and/or the IPR Assignment shall control. In the event of conflict between the Asset Purchase Agreement and the IPR Assignment, the latter shall take precedent.

The Assignor confirms that it shall, from time to time, execute and deliver to the Assignee such additional instruments, documents, conveyances or assurances and take such other action as shall be necessary or otherwise reasonably requested by the Assignee to confirm and assure the rights and obligations provided for in this Assignment and the Asset Purchase Agreement and or the IPR Assignment and render effective the consummation of the transactions contemplated hereby and thereby including, but not limited to the execution of all non-provisionals, divisionals, continuations, continuations-in-part, substitutes, reexaminations, reissues, and all other patent applications on the invention; execute all lawful oaths, declarations, assignments, powers of attorney and other papers; communicate to the Assignee all facts known to the Assignor relating to the invention and the history hereof; and generally do everything possible which the Assignee shall consider necessary for vesting title to the Assigned Rights in the Assignee, and for securing, maintaining and enforcing proper protection for the Assigned Rights.

This Assignment may be executed simultaneously in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

This Assignment shall be governed and construed in accordance with the laws of England and Wales and shall be binding on the heirs, assigns, representatives and successors of the Assignor and extending to the successors, assigns, and nominees of the Assignee. The courts of England shall have exclusive jurisdiction to settle any dispute or claim arising out this Assignment, or its subject matter or formation.
