ASSIGNEE:

Key Technology, Inc.
Corporation of the State of Oregon
150 Avery St.
Walla Walla, WA 99362

BACKGROUND OF THIS GENERAL ASSIGNMENT:

Inventors have conceived certain new and useful inventions disclosed in a United States patent application titled "**PRODUCT DIVERTER FOR A RECIPROCALLY MOVABLE CONVEYING DEVICE.**"

KEY TECHNOLOGY, INC. (hereinafter referred to as "ASSIGNEE") desires to acquire the entire right, title and interest in said inventions and with respect to any Letters Patent that may be granted with respect to the above identified, and any future inventions, in both the United States and in all foreign countries.

THE PARTIES AGREE AS FOLLOWS:

For good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, INVENTORS have sold, assigned and transferred to ASSIGNEE, the full and exclusive right to any and all inventions conceived by the INVENTORS in the United States, and in all foreign countries.

INVENTORS do hereby sell, assign and transfer to ASSIGNEE the entire right, title and interest in the above-identified invention, and any other, future, unnamed inventions, and applications, and to any reissues, renewals, divisions or continuations of any patent application thereof to the ASSIGNEE, and further hereby authorizes the Commissioner of Patents and Trademarks to issue such Letters Patent to the ASSIGNEE, and for the sole use of ASSIGNEE, its successors or assigns.

As one of the below-identified INVENTORS, I hereby declare that the above-identified, or any future identified patent application was made or authorized to be made by me; that I believe that I am the original inventor, or an original joint inventor of a claimed invention in the present or any future patent application; and I further acknowledge that any willful false statements made in this Declaration is punishable under 18 USC 1001 by fine, or imprisonment of not more than five (5) years, or both.

INVENTORS further agree to execute, at the request and expense of ASSIGNEE such other formal documents as may be required to fully convey the interest transferred

herein, and will similarly execute any application papers required for the filing of any original, first filed patent application, divisional, continuation, renewal, or reissue of the above-identified patent application, or any future, unnamed patent application, and where they are identified as a named INVENTOR, and which results in an issued Letters Patent; and will generally do everything which is otherwise reasonably necessary or desirable to obtain and enforce proper protection for the inventions assigned hereby. If the respective INVENTORS are unwilling or unable to execute documents necessary to file appropriate domestic or foreign patent application(s) which are effective to obtain and enforce proper protection of the inventions which are being assigned, or further, if the respective INVENTORS are no longer employed by, or rendering professional services to the ASSIGNEE, the respective INVENTORS hereby appoints, under any of the aforementioned circumstances, the ASSIGNEE as their respective Attorney-in-Fact to execute any such documents on their behalf, both retroactively, and prospectively, and without further notice to the INVENTOR(S).

INVENTORS further assign to ASSIGNEE the whole right, title and interest in the inventions disclosed in the present application, or any future, unnamed patent applications, throughout all countries foreign to the United States. ASSIGNEE is hereby authorized to apply for patents relating to the inventions which are assigned in its own name in countries where such procedure is proper; to claim the benefit of the International Convention; to file and prosecute International Applications relating to the inventions under the Patent Cooperation Treaty; and to file and prosecute applications relating to the inventions under the European Patent Convention. INVENTORS agree to execute any and all applications relating to the inventions in those countries and under those conventions where it is necessary that the same be executed by the

accessibility of such inventor, and to execute assignments of such applications and the resulting Letters Patent to ASSIGNEE as well as all other necessary papers in relation to such applications and Letters Patent.
