## PATENT ASSIGNMENT AGREEMENT

This Patent Assignment Agreement (this “Agreement”) is made and entered into effective as of the 11<sup>th</sup> day of December, 2018 (the “**Effective Date**”) by and among Sreenivas Raman, an individual residing at 4 Wortendyke Rd, Park Ridge, NJ 07656, Elie Cherbaka, an individual residing at 749 Natures Way, Franklin Lakes, NJ 07417 (each an “**Acquirer**” and together the “**Acquirers**”), and Integrated Construction Enterprises, Inc., a New Jersey corporation having its principal place of business at 259 Stephens Street, Belleville, NJ 07109 (hereinafter “**ICE**”).

**WHEREAS**, The Acquirers are stockholders of ICE and have been issued a dividend in the form of a patent assignment pursuant to which ICE shall transfer, convey, assign and deliver to Acquirers all of ICE’s rights, title and interests in all patent applications and issued patents that are identified on Annex A attached hereto, or claim priority to any patent application listed on Annex A (collectively, the “**Assigned Patents**”).

**NOW, THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound, ICE and Acquirers (each a “**Party**” and collectively, the “**Parties**”) agree as follows:

1. Patent Assignment. ICE hereby conveys, transfers, and assigns to each Acquirer, and their successors and assigns, an undivided one half interest with a duty to account based upon each Acquirer’s proportional ownership interest in ICE in and to ICE’s entire right, title and interest for the United States, its territories and possession, and all foreign countries in and to the Assigned Patents and all rights, claims and privileges pertaining thereto, including without limitation, all inventions and discoveries disclosed therein, certificates of invention and applications for certificates of invention, and any substitutions, reissues, reexaminations, divisions, renewals, extensions, provisionals, continuations, continuations-in-part, continued prosecution applications, and corresponding foreign patents and patent applications and foreign counterparts thereof, and any and all rights to sue and recover for claims and remedies against and collect damages and other recoveries for past, present and future infringements of any or all of the foregoing, and rights for priority and protection of interests therein under the laws of any jurisdiction and hereby grants to Acquirers the right to apply, obtain and hold in their own names for patents or inventor’s certificates and related rights heretofore or hereafter filed in any and all countries, including, without limitation, the right to prosecute and maintain the same and all rights to claim priority based thereon, all patents granted thereon and all reissues, extensions and renewals thereof.

2. Authorization. ICE authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any other official throughout the world whose duty is to register and record ownership in patent registrations and applications for registration of patents, to record Acquirers as the assignees and owners of any and all right in the Assigned Patents.

3. Representations and Warranties of ICE. ICE has full title and ownership of all of the Assigned Patents free and clear of all Liens (as defined below). The Assigned Patents are fully transferable by ICE without restriction and without payment of any kind to any third party.

All individuals who participated in the development, creation, conception, or reduction to practice of the Assigned Patents have executed and delivered to ICE valid and enforceable written agreements providing for the assignment of each such individual's rights, title and interest in and to such Assigned Patents and any related intellectual property rights embodied therein. For purposes of this Agreement "**Lien**" shall mean any lien, pledge, charge, claim, mortgage, encumbrance, security interest, defect in title, preemptive right, vesting limitation, right of first offer or refusal, transfer restriction of any kind or other encumbrance of any sort.

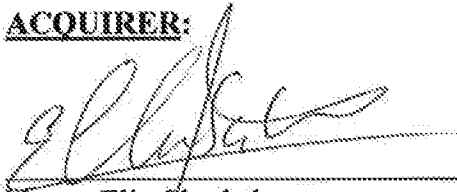

4. Miscellaneous. This Assignment will be binding upon and inure to the benefit of the Parties hereto and their respective successors and permitted assigns, each of which such successors and permitted assigns will be deemed to be a Party hereto for all purposes hereof. This Assignment and any of the terms contained herein may be amended or modified by ICE and Acquirers only in writing. This Assignment is executed by, and shall be binding upon, ICE and Acquirers and their respective successors and assigns, for the uses and purposes set forth and referred to above, effective immediately upon its delivery to Acquirers. This Assignment shall be governed by and construed in accordance with the laws of the State of Delaware, without regard to conflict of law principles. This Agreement may be executed in multiple counterparts, each of which shall be an original, but all of which together shall constitute one and the same agreement. This Agreement, any and all agreements and instruments executed and delivered in accordance herewith, along with any amendments hereto or thereto, to the extent signed and delivered by means of a facsimile machine or email delivery of a ".pdf" or similar format data file, shall be treated in all manner and respects and for all purposes as an original signature, agreement or instrument and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person. No Party hereto shall raise the use of a facsimile machine or email delivery of a ".pdf" or similar format data file to deliver a signature to this Agreement or any amendment hereto or the fact that such signature was transmitted or communicated through the use of a facsimile machine or e-mail delivery of a ".pdf" or similar format date file as a defense to the formation or enforceability of a contract and each Party hereto forever waives any such defense.
