ASSIGNMENT

WHEREAS, we, Garth A. Elias, of Pittsburgh, PA, Mark Scaife, of Pittsburgh, PA, and Peter D. Allen, of Pittsburgh, PA, have, along with others, invented a certain invention, entitled ADJUSTABLE RETAINING ARM SYSTEM, for which the following application has been filed:

PCT Patent Application No. PCT/US2018/016594, filed on February 2, 2018, the application is referred to as “the patent application.”

WHEREAS, UPMC, a corporation of the Commonwealth of Pennsylvania, having a place of business at 600 Grant Street, Pittsburgh, Pennsylvania 15219, desires to acquire an interest therein; and

NOW, THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, we hereby sell, assign, and transfer to the UPMC all of our rights, title, and interest in and to said invention, the patent application, and patent rights throughout the world, including foreign patent priority rights, our rights to file and prosecute International Applications under the Patent Cooperation Treaty, and our right to file and prosecute applications under the European Patent Convention; our rights in said invention, the patent application, and any resulting patents in this or any foreign country, and all corresponding non-provisional applications, divisions, continuations, continuations-in-part, reissues, and extensions thereof, to be held and enjoyed by the UPMC, for its own use and benefit, and for its successors and assigns to the full end of the term for which letters patent may be granted by the United States or any foreign country, as fully and entirely as the same would have been held by us had this assignment and sale not been made, and covenant that we have full right so to do, and agree that we will communicate to the UPMC, or its successors and assigns, any facts known to us respecting said invention, and testify in any legal proceeding, sign all lawful papers, execute all divisional, continuing, and reissue applications, make all rightful oaths, and do everything possible to aid the UPMC, its successors, and assigns to obtain and enforce proper patent protection for said invention in the United States or any foreign country.

We confirm that, at the time the invention was made, we were under an obligation to assign the invention to the UPMC.
