# PATENT ASSIGNMENT

This Patent Assignment (this "Assignment"), is made effective as of March 4, 2019, by and among Lutron Electronics Co., Inc., a Pennsylvania corporation (""Assignor") and Lutron Technology Company LLC, a Delaware limited liability company ("Assignee").

WHEREAS, Assignor is the owner of all right, title and interest in, to and under the issued patents and patent applications set forth on Exhibit A attached hereto; and

WHEREAS, contemporaneously with the execution of this Assignment, Assignor and Assignee are entering into a certain Agreement between Lutron Electronics Co., Inc. and Lutron Technology Company LLC (as it may be amended, supplemented or modified from time to time, the "Agreement"), pursuant to which, among other things, Assignor transferred to Assignee all of Assignor's right, title and interest in and to all of Assignor's issued patents and patent applications, including without limitation those set forth on Exhibit A (collectively, the "Transferred Patents");

NOW, THEREFORE, in consideration of the mutual covenants, conditions and agreements set forth herein and in the Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Assignment. Assignor hereby assigns, transfers and conveys to Assignee in perpetuity, and Assignee hereby accepts, all right, title and interest, whether now or hereafter existing, in and to the Transferred Patents transferred by Assignor. As part of such assignment, Assignor assigns, transfers and conveys to Assignee, for Assignee's own use and enjoyment and for the use and enjoyment of Assignee's successors, assigns and other legal representatives, as fully as the same would have been held and enjoyed by Assignor if this Assignment had not been made, the following:

(a) all patents and patent applications, provisional and non-provisional, in the Transferred Patents, including the right to claim priority therefrom;

(b) all reissues, reexaminations, extensions, non-provisionals, continuations, continuations-in-part, continuing prosecution applications, requests for continuing examinations, divisionals and registrations of any of the Transferred Patents and/or any item in the foregoing category (a);

(c) all foreign counterpart patents and foreign counterpart patent applications relating to and/or directly or indirectly claiming priority from any of the Transferred Patents and/or any item in any of the foregoing categories (a) through (b), including, without limitation, certificates of invention, utility models, industrial design protection, design patent protection and any other governmental grants or issuances;

(d) all inventions, invention disclosures, designs and discoveries disclosed or claimed in the Transferred Patents and/or any item in any of the foregoing categories (a) through (c);

(e) all rights to apply in any or all countries of the world for patents, certificates of invention, utility models, industrial design protections, design patent protections or other governmental grants or issuances of any type related to any of the Transferred Patents and/or any item in any of the foregoing categories (a) through (d), including, without limitation, under the Paris Convention for the Protection of Industrial Property, the International Patent Cooperation Treaty or any other similar convention, treaty, agreement or understanding;

PATENT
REEL: 049884 FRAME: 0006

(f) for any Transferred Patent and/or any item in any of the foregoing categories (a) through (e) terminally disclaimed to another patent or patent application, all patents and patent applications subject to any such terminal disclaimer; and

(g) all patents that issue from any of the Transferred Patents and/or any item in any of the foregoing categories (a) through (f).

2. Recordation. Assignor hereby authorizes the Commissioner for Patents in the United States Patent and Trademark Office, and the corresponding entities or agencies in each applicable foreign country or multinational authority, to: (a) record Assignee as the assignee and owner of the entire interest in the Transferred Patents or other rights identified in this Assignment; (b) deliver to Assignee, and to Assignee's attorneys, agents, successors or assigns, all official documents and communications as may be warranted by this Assignment; and (c) issue any and all patents, certificates of invention, utility models or other governmental grants or issuances that may be granted upon any of the Transferred Patents or other rights identified in this Assignment in the name of Assignee, as the assignee to the entire interest therein.

3. Further Assurances. At any time and from time to time after the date hereof, Assignor shall promptly execute and deliver such other instruments of sale, transfer, conveyance, assignment, assumption and confirmation, and take such other action as Assignee may reasonably request to carry out the purpose and intent of this Assignment, including any act necessary or desirable for obtaining, sustaining or reissuing any registrations for the Transferred Patents and any other rights identified in this Assignment, and to transfer, convey, assign and deliver to Assignee the title in and to the Transferred Patents and other rights identified in this Assignment, and to confirm Assignee's acceptance, assumption and undertaking with respect thereto.

4. Agreement. Nothing herein shall be deemed to extend or amplify the rights, remedies, duties and obligations of Assignee or Assignor under the Agreement and, to the extent that there is any conflict between the terms and conditions of this Assignment and the terms and conditions of the Agreement, the terms and conditions of the Agreement shall govern, supersede and prevail.

5. Miscellaneous.

(a) Headings. The headings contained in this Assignment are intended solely for convenience and shall not affect the rights of the parties to this Assignment.

(b) Governing Law. This Assignment and any claim or controversy hereunder shall be governed by and construed in accordance with the laws of the State of Delaware without giving effect to the principles of conflict of laws thereof.

(c) Counterparts and Facsimile Signatures. This Assignment may be signed in any number of counterparts with the same effect as if the signatures to each counterpart were upon a single instrument, and all such counterparts together shall be deemed an original of this Assignment. Delivery of an executed counterpart of this Assignment by facsimile transmission or by electronic mail in portable document format (.pdf) shall be as effective as delivery of a manually executed counterpart hereof.

(d) Amendments. This Assignment shall not be amended except by an instrument in writing signed on behalf of each of the parties.

(e) Successors and Assigns. This Assignment is executed by, shall be binding upon, and shall inure to the benefit of, the parties hereto and their respective successors and assigns for the uses and purposes above set forth.

IN WITNESS WHEREOF, the parties hereto have duly executed and delivered this Assignment as of the date first written above.
