WORLD-WIDE ASSIGNMENT OF PATENT AND PATENT APPLICATION RIGHTS

Avanzato Technology Corp. ("Assignor") is 100% owner of the inventions described in the EXHIBIT attached after the last page of this Assignment paper, described by Title, and listed below by U.S. Patent Application Number or Patent (U.S. or foreign jurisdiction) Registration number filed on the correspondingly listed filing dates ("Inventions").

14th Round Inc. ("Assignee") desires to acquire all rights in and to the Inventions and the patent (and any reissues, continuations, or extensions) that may be granted in the U.S. or any other jurisdiction in the world.

Therefore, for valuable consideration of \$1, the receipt of which is acknowledged, Assignor assigns to Assignee 100% of its right, title, and interest in the Inventions (as well as such rights in any divisions, continuations in whole or part, or substitute applications and registrations) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part, or substitute applications and registrations) filed claiming the benefit of the Inventions.

Assignor authorizes the United States Patent and Trademark Office and any patent office of any other foreign jurisdiction, including Canada, China, the European Union Intellectual Property Office, and the European Patent Office, to issue any Patents or Designs resulting from or taking priority from the Inventions to Assignee according to the percentage interest indicated in this assignment (i.e. 100%). The right, title, and interest is to be held and enjoyed by Assignee and

Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

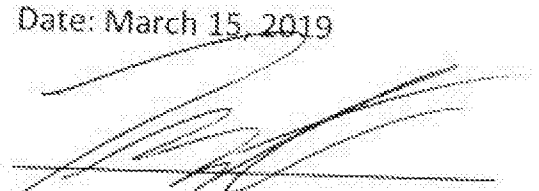

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of any one and all of the inventions and foreign counterpart applications/patents/registrations; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications, registrations, and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the enforceability of the inventions in any and all countries.
