WHEREAS, Assignor is the owner of the inventions, discoveries and applications (collectively the "Inventions") as described and claimed in the United States patents and patent applications listed on Schedules A-E attached hereto (collectively, the "Patents"); and

WHEREAS, Assignor and Assignee have agreed that Assignor shall sell, transfer, assign and set over unto Assignee, and Assignee shall accept, all of Assignor's right, title and interest in and to the Patents.

NOW, THEREFORE, in consideration of the mutual covenants and agreements of the Parties set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the Parties, the Parties hereby agree as follows:

(1) Assignor hereby sells, transfers, assigns and sets over to Assignee all of Assignor's right, title and interest (for all countries) in and to the Patents and Patent Applications listed in Schedules A-E, any rights and privileges under any letters patent that may be granted therefor and thereon, all patent applications including continuations, continuations-in-part, divisions, reissues, reexaminations, extensions thereof, and all patent applications claiming priority from the Patents; and all applications for industrial property protection, including without limitation, all applications for patents, utility models, copyright, and designs which may hereafter be filed for said Inventions and relating to the subject matter of the Patents in any country or countries, together with the right to file such applications and the right to claim for the same the priority rights derived from the Patents under the patent laws of the United States, the International Convention for the Protection of Industrial Property, or any other international agreement or the domestic laws of the country in which any such application is filed, as applicable; and all applications for industrial property protection, including, without limitation, all applications for patents, utility models, copyrights and designs which may hereafter be filed for said Inventions or the subject matter of the Patents in any country or countries, together with the right to file such applications; and all forms of industrial property protection, including, without limitation, patents, utility models, inventors' certificates, copyrights and designs which may be granted for the subject matter of said Patent in any country or countries and all extensions, renewals and reissues thereof.

(3) Assignor agrees that, at any time upon the request of Assignee, Assignor will execute and deliver all papers, take all rightful oaths, and do all acts which may be necessary or desirable to secure and maintain patent protection on the Inventions throughout all countries of the world and for vesting title thereto in Assignee, its successors, assigns and legal representatives or nominees, and otherwise to do the necessary acts to give full effect to and to perfect the rights of the Assignee under this Agreement, including the execution, delivery and procurement of any and all further documents evidencing this Agreement, transfer and sale as may be necessary, provided Assignee shall reimburse Assignor for any reasonable out of pocket expenses incurred in doing so.

(4) Assignor represents and warrants that it is an owner of the Inventions and Patents. Assignor hereby covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this Agreement.

(6) Assignor hereby consents that a copy of this Agreement shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document that may be required in any country for any purpose and more particularly in proof of the right of Assignee or nominee to claim the aforesaid benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.

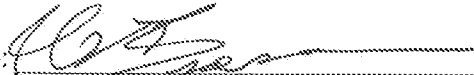

(7) All of the rights, title and interest in and to the Patents sold, transferred, assigned and set over to Assignee hereunder include all income, royalties, damages and payments now or hereafter due or payable with respect thereto, and all causes of action (whether in law or equity) and the right to sue, counterclaim, and recover for the past, present and future infringement of the rights assigned or to be assigned hereunder.

(8) If any portion of this Agreement is found to be contrary to law or ineffective, the remainder of the Agreement shall survive and be interpreted, to the maximum extent possible, for the purpose of carrying out the intent of the parties which is the full and complete transfer and assignment of Assignor's rights to the Patents to Assignee.
