Schedule 2
Form of U.S. Patent Assignment

Patent Assignment

For good and valuable consideration, the receipt of which is hereby acknowledged, and subject to the encumbrances described, and the other terms and conditions set forth, in the Patent Sale and Assignment Agreement dated as of December 21, 2018 ("Patent Sale Agreement") between Microchip Technology Inc., a Delaware corporation and its Affiliates, including Atmel Corporation and Microchip Technology Germany GmbH ("Assignor"), and Neodrón Limited, a company incorporated in Ireland ("Assignee"), Assignor hereby sells and assigns to Assignee, all of Assignor's right, title, and interest in and to (i) the U.S. registered patents and patent applications listed in Attachment A ("Listed Patents"), (ii) any patents that may issue on the patent applications included in the Listed Patents, (iii) any reissues and renewals of any Listed Patents, and (iv) any results of oppositions, reexaminations, supplemental examinations, and other review procedures with respect to any Listed Patents (collectively, including the Listed Patents, the "Assigned Patents") for the full term of such Assigned Patents, including any rights to (a) maintain, further prosecute, and renew the Assigned Patents (in each case where possible under applicable law), (b) transfer, and grant licenses and other rights under, the Assigned Patents, and (c) enforce, and bring actions for all past, present and future infringement of, the Assigned Patents.

In witness whereof, the Parties have caused their duly authorized representatives to execute this Agreement as of the date hereof.
