Invention and Patent Rights Assignment Agreement

This Invention and Patent Rights Assignment Agreement ("Agreement") is entered into by and among the following parties:

A. Anchor Packaging, LLC, a Missouri limited liability company, of 13515 Barrett Parkway Drive, St. Louis, Missouri (referred to herein as "Assignee"); and

B. Kevin Krueger, a United States citizen residing in Fenton, Missouri, U.S.A; and Mike Pohlman, a United States citizen residing in Valley Park, Missouri, U.S.A. (referred to herein as "Assignors");

WHEREAS, Assignors claim to be the inventors of the invention ("Invention") described in a patent application (the "Application"), titled PLASTIC FOOD CONTAINER that was filed in the United States Patent and Trademark Office ("USPTO") on June 12, 2019 and assigned USPTO Application No. 29/694,618.

NOW, THEREFORE, for and in consideration of the sum of One Dollar (\$1.00) and other good and valuable consideration, the receipt and sufficiency of all such consideration being hereby acknowledged, Assignors hereby assign to Assignee, and confirm any prior assignments or obligations to assign to Assignee, and its successors in interest of, their full and exclusive right, title and interest in and to the Invention and Application. The foregoing assignment and confirmation of assignment effects or confirms the assignment of all right, title and interest in and to the Invention and Application in the United States of America and throughout the world, including the right to claim priority under the laws of the United States of America, of the Paris Convention and of any other regions and countries to the Invention, any improvements to the Invention and to the Application, together with any continuations, continuations-in-part or divisionals thereof, and any patents issuing thereon and all reissues, reexaminations or extensions thereof, and all national and regional applications and patents claiming priority thereto, including the right to sue for and to recover for past infringements of or liabilities for any of the rights relating to any of the applications or patents resulting there from, as fully and entirely as the same would have been held and enjoyed by the Assignors, if this assignment had not been made.

Assignors hereby authorize and request the appropriate governmental officials to issue any and all such United States, national or regional Letters Patent arising from or related to the Application, Invention, improvements to the Invention or resulting from the aforesaid Application to Assignee, as assignee of the entire right, title and interest in and to the same.

For purposes of more specifically identifying the Application, the Assignors hereby authorize and request Assignee or its representatives to insert the date of filing and application number received from the United States Patent & Trademark Office for the Application in the spaces reserved in this document for such information (if such information is not already printed in this document at the time of their execution of this document).

Each of the Assignors hereby represent, warrant and covenant that he or she has the full right to convey the entire interest herein assigned, that he or she has not executed and will not execute any instrument or assignment in conflict herewith, including any assignment or license (excepting only prior assignments to Assignee) and that the rights assigned herein are not otherwise encumbered by any sale, assignment, grant or conveyance (excepting only prior assignments to Assignee).

Assignors further covenant and agree that Assignors will at any time upon request make, execute and deliver without further compensation, any and all other instruments in writing, including further applications, papers, affidavits, powers of attorney, assignments, and other documents, and do all lawful acts and things, which, in the opinion of Assignee, its counsel, successors or assigns, may in any country be required or necessary to more effectively secure to and vest in the Assignee, its successors or assigns the

Patent Rights hereby assigned, transferred and conveyed, and that they will sign any applications for reissue, division, continuation, continuation-in-part, renewal, substitute or extension of Letters Patent for the Application, Invention or improvements thereon.

Assignors agree to execute all papers and documents and to perform any act that may be necessary in connection with claims or provisions of the International Convention for the Protection of Industrial Property or similar agreements.

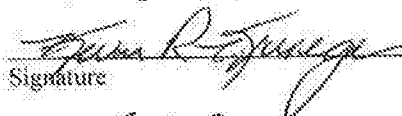

Assignors further covenant and agree that Assignors will at any time upon request, communicate to the Assignee, its successors, assigns or legal representatives any facts relating to the Application or Invention known to them, and will testify as to the same in any interference, litigation, mediation, arbitration or other proceeding when requested to do so.

Assignors and Assignee covenant and agree that this Agreement may be executed in any number of separate counterparts, each of which shall be deemed an original, but all of which, when taken together, shall constitute one agreement, which shall be binding upon and effective as to all of the parties. Assignors and Assignee further covenant and agree that signatures communicated electronically or by facsimile are permissible and enforceable.

Any third-party is hereby authorized to accept and to treat a copy of this instrument as the original.
