Box 244, Emmaus, PA 18049** (hereinafter called "ASSIGNEE"), the entire worldwide right, title and interest in and to the inventions known as "**METHODS OF MAKING AND USING AN IDENTIFICATION TAG SYSTEM FOR USE WITH AN ELECTROMAGNETIC ENERGY CABLE**", and U.S. Non Provisional Patent Application, Serial No.: 16/563,844, which was filed in the United States Patent and Trademark Office on September 7, 2019 and all rights and privileges under any Letters Patent which may be granted thereon, and any drawings, notes, models, and all disclosure materials for the same, and on any Letters Patent which may be granted on any non-provisional utility, continuation, continuation-in-part or divisional patent application of the aforementioned patent application, including all rights, if any, throughout the entire world to sue for all past infringements which may have occurred before the execution of this assignment.

1. ASSIGNORS agree without charge to said ASSIGNEE but at ASSIGNEE'S expense (a) to execute all papers, take all rightful oaths, and do all acts which may be necessary, desirable or convenient for securing and maintaining patents for said invention in any and all countries and for vesting title therein in ASSIGNEE, its successors, assigns or nominees; (b) to execute all papers in connection with any interference or other legal or quasi-legal proceedings relating to this application or to any continuation, continuation-in-part, or divisional applications thereof; (c) to execute all papers and documents which may be necessary in connection with the preparation and filing of any foreign applications or with making claims to priority rights granted under the provisions of the International Convention for Protection of Industrial Property

2. ASSIGNORS hereby authorize and request the Commissioner of Patents and Trademarks of the United States, and the appropriate officials in any other country, to issue any and all Letters Patent that may be granted upon any patent application or any additional, continuation, continuation-in-part or divisional applications thereof to the ASSIGNEE, its successors, assigns or nominees.

3. ASSIGNORS further assign to and empower ASSIGNEE, its successors, assigns or nominees, all rights to make applications for patents or other forms of protection for said invention and to prosecute such applications and said patent applications, as well as to claim and receive the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and the right to invoke and claim such right of priority without further written or oral authorization.

4.
