ASSIGNMENT

This assignment is by Michael SCHMITT, Jesse SALK, and Lawrence A. LOEB ("Assignors"). The effective date of this assignment is March 15, 2013. Assignors have invented one or more certain inventions (the "Invention(s)") described in an International Patent Application entitled METHODS OF LOWERING THE ERROR RATE OF MASSIVELY PARALLEL DNA SEQUENCING USING DUPLEX CONSENSUS SEQUENCING, filed March 15, 2013, as International Application No. PCT/US2013/032665 (the "Application").

UNIVERSITY OF WASHINGTON THROUGH ITS CENTER FOR COMMERCIALIZATION, a university of the State of Washington, having a place of business at 4311 11th Ave. NE, Suite 500, Seattle, WA, 98105 ("Assignee"), desires to acquire the entire right, title, and interest in and to the Invention(s) and the Application, and in and to any patents (collectively, "Patents") that may be granted for the Invention(s) in the United States or in any foreign countries.

For valuable consideration, the receipt and sufficiency of which we acknowledge, Assignors hereby sell, assign, and transfer to Assignee, its successors, legal representatives and assigns, the entire right, title, and interest in and to: the Invention(s), the Application, and any Patents; any divisions, continuations, continuations-in-part, or national phase counterparts of the Application; any reissues, reexaminations, or extensions of any and all Patents; the right to file foreign applications directly in the name of Assignee; and the right to claim priority rights deriving from the Application (collectively, the "Rights"). Assignors warrant that they are the sole owner of the Rights, and that the Rights are unencumbered. Assignors also agree to not sign any writing or do any act conflicting with this assignment and to sign all documents and do such additional acts as Assignee deems necessary or desirable to perfect Assignee's enjoyment of the Rights; prepare and prosecute the Application or any other applications for Patents; conduct proceedings regarding the Rights, including any litigation or interference proceedings; or perfect or defend title to the Rights.

Assignors request that any Patent be issued on the Invention(s) to Assignee.

This Assignment may be executed in counterparts.
