ASSIGNMENT

WHEREAS, Giampiero Esposito, of Pasadena, California, Mauro Marchetti, of Amsterdam, Netherlands, and Sathya Padmanabhan, of Glendora, California, Assignors, have invented a new and useful MILLIMETER WAVE ACTIVE LOAD PULL USING LOW FREQUENCY PHASE AND AMPLITUDE TUNING, for which applications for United States Letters Patent were filed on September 28, 2018, under Application No. 62/739,003, and October 1, 2018, under Application No. 62/739,791; and

WHEREAS, Assignors believe themselves to be the original, first, and joint inventors of the inventions disclosed and claimed in the applications for Letters Patent; and

WHEREAS, Maury Microwave, Inc., a California corporation, having a place of business at 2900 Inland Empire Boulevard, Ontario, California 91764, Assignee, desires to acquire by formal, recordable assignment the entire right, title, and interest in and to the inventions, the applications, and any Letters Patent that might be granted for the inventions in the United States and throughout the world;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignors hereby sell, assign, and transfer to Assignee, the entire right, title, and interest in and to the inventions, the applications, and any Letters Patent that might be granted for the inventions in the United States and throughout the world, including the right to file foreign applications directly in the name of Assignee and to claim for any such foreign applications any priority rights to which such applications are entitled under international conventions, treaties, or otherwise.

Further, Assignors agree that, upon request and without further compensation, but at no expense to Assignors, they and their legal representatives and assigns will perform all lawful acts, including the execution of papers and the giving of testimony, that might be

necessary or desirable for obtaining, sustaining, reissuing, or enforcing Letters Patent in the United States and throughout the world for the inventions, and for perfecting, recording, or maintaining the title of Assignee, and its successors and assigns, to the inventions, the applications, and any Letters Patent granted for the inventions in the United States and throughout the world.

Assignors represent and warrant that they have not granted and will not grant to others any rights inconsistent with the rights granted by this Assignment.

Assignors authorize and request the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any Letters Patent granted for the inventions, whether on the applications or on any subsequently filed divisional, continuation, continuation-in-part, or reissue application, to Assignee, and its successors and assigns, as the assignee of the entire interest in the inventions.

IN WITNESS WHEREOF, Assignors have executed this Assignment.
