GAMBLIT GAMING, LLC

GRANT OF SECURITY INTEREST IN UNITED STATES PATENTS

August 21, 2019

FOR GOOD AND VALUABLE CONSIDERATION, receipt and sufficiency of which are hereby acknowledged, Gamblit Gaming, LLC, a Delaware limited liability company with its principal office located at 700 N. Central Avenue, Suite 700, Glendale, CA 91203 (the “**Grantor**”), and the undersigned grantee (the “**Grantee**”) hereby agree as follows:

Grantor hereby grants to the Grantee a continuing security interest in (i) all of the Grantor’s rights, title and interests in, to and under the United States patents and patent applications (the “**Patents**”) set forth on Schedule A attached hereto, (ii) any and all rights and privileges arising under applicable law with respect to Grantor’s use of the Patents, (iii) any and all inventions and improvements described therein, (iv) any and all issuances, reissues, divisions, continuations, renewals, extensions and continuations-in-part thereof, (v) all income, fees, royalties, damages, claims and payments now or hereafter due and/or payable thereunder and with respect thereto including, without limitation, damages and payments for past, present or future infringements thereof, (vi) any and all rights corresponding thereto throughout the world and (vii) any and all rights to sue for past, present or future infringements thereof.

Capitalized terms used herein but not otherwise defined shall have the meaning ascribed to such terms in the Security Agreement by and between the Grantor and the Grantee, dated as of December 30, 2016 (as amended, modified, restated and/or supplemented from time to time, the “**Security Agreement**”). This grant of security interest in the Patents (this “**Grant**”) is made to secure the satisfactory performance and payment of all the Secured Obligations of the Grantor. The rights and remedies of the Grantee with respect to the security interest granted herein are as set forth in the Security Agreement, all terms and provisions of which are incorporated herein by reference. In the event that any provisions of this Grant are deemed to conflict with the Security Agreement, the provisions of the Security Agreement shall govern.

Grantor shall have the duty, with respect to the Patents used in the Grantor’s business, to use commercially reasonable efforts to protect, enforce and defend, at Grantor’s expense, such Patents, including (A) to the extent commercially practicable for Grantor, enforcing, defending, including suing for infringement or misappropriation, and recovering any and all damages for such infringement or misappropriation (B) to prosecute any patent application that is used in the Grantor’s business and part of the Patents pending as of the date hereof or hereafter until the termination of the Security Agreement and (C) to take all commercially reasonable and necessary action to preserve and maintain all of Grantor’s Patents and its rights therein, including paying all maintenance fees thereof. Grantor further agrees to avoid abandonment of any issued patents of the Patents or similar rights used in the Grantor’s business.

Grantor acknowledges and agrees that the Grantee shall have no duties with respect to any Patents or Patent licenses or other similar rights of Grantor. Without limiting the generality of this paragraph, Grantor acknowledges and agrees that Grantee shall not be under any

obligation to take any steps necessary to preserve rights in the Collateral consisting of Patents or Patent licenses or other similar rights against any other person or entity (the "Actions"), but any Grantee may take such Actions, only to the extent commercially practicable for Grantor, at its option from and after the occurrence and during the continuance of an Event of Default, and all expenses incurred in connection therewith shall be at the sole expense of such Grantor; provided that, notwithstanding anything to the contrary contained herein, to the extent that Grantee successfully forecloses on the Patents, and collects, receives, appropriates, realizes or otherwise claims the right to recover the Patents, Grantee shall be solely responsible for all such expenses incurred following such foreclosure.

As soon as available and in any event within 120 days after the end of each fiscal year of the Grantor, Grantor shall provide the Grantees with any additional Patent Security Agreements necessary to record with the United States Patent and Trademark Office the Grantees' Lien on the United States Patents (and applications therefor) owned by Grantor and included in the Collateral.

Grantor shall take all reasonable steps that Grantor deems appropriate under the circumstances, using its reasonable business judgment, to maintain the confidentiality of (to the extent permissible under applicable law), and otherwise protect and enforce its rights in, the Patents that are necessary in the conduct of Grantor's business.

Grantor shall not enter into any Patent license, or other similar right material to the business of Grantor, to receive any license or rights in any Patents of any other person or entity unless Grantor has used commercially reasonable efforts to not prohibit the assignment of or grant of a security interest in such Patent license or other similar right (and all rights of Grantor thereunder) to the Grantee.
