## **Recordable Confirmatory Patent Assignment**

This Recordable Confirmatory Patent Assignment ("Patent Assignment"), effective as of June 24, 2019, is made by and between Brunswick Corporation, a Delaware corporation ("Assignor"), and Life Fitness, LLC, a Delaware limited liability company ("Assignee") (collectively referred to as the "Parties").

WHEREAS, pursuant to the Intellectual Property Assignment and Assumption Agreement between the Parties dated as of June 24, 2019 (the "Agreement"), Assignor has sold, assigned, transferred, conveyed and delivered to Assignee all right, title and interest in, to and under the patents and/or patent applications identified in Schedule A attached hereto (the "Patents"); and

WHEREAS, Assignee has acquired all of Assignor's right, title and interest in and to the Patents, and the Parties wish to record such acquisition in the United States Patent and Trademark Office (the "USPTO").

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, the Parties hereby agree as follows:

Capitalized terms used herein and not defined herein have the meanings set forth in the Agreement.

Pursuant to the Agreement, Assignor hereby sells, assigns, transfers, conveys and delivers to Assignee all of Assignor's right, title and interest in, to and under (i) the Patents, including all patent applications, provisionals, non-provisionals, continuations, divisionals, continuations-in-part, substitutions, reexaminations, inter-partes reviews, oppositions, renewals and reissues, and all extensions thereof, (ii) Assignor's rights of enforcement and the rights, interests, claims and demands recoverable in law or equity that Assignor has or may have in profits and damages for past, present and future infringements or misappropriations of the Patents, including the right to compromise, sue for and collect such profits and damages, (iii) rights of priority resulting from the filing of the Patents and (iv) Assignor's other rights, relating to the Patents, to the extent such rights exist or may exist in the future, each to be held and enjoyed by Assignee for its own use and benefit and for the use and benefit of its successors, assigns and legal representatives as said rights would have been held and enjoyed by Assignor had this assignment and sale not been made.

Assignor hereby authorizes the Commissioner for Patents in the USPTO, other empowered officials of the USPTO and the officials of corresponding entities or agencies in any applicable jurisdictions to record and register this Patent Assignment and Assignor further agrees to execute and deliver, or cause to be executed and delivered, all documents, certificates, agreements and other writings and take such other actions as may be reasonably necessary or desirable in order to consummate or implement expeditiously the transactions contemplated by this Patent Assignment.

This Patent Assignment is subject to all the terms and conditions of the Agreement. The Parties intend that this Patent Assignment is for recordation purposes only and its terms shall not modify and shall be subject to the applicable terms and conditions of the Agreement, which govern the Parties' rights and interests in the Assigned IP.

This Patent Assignment, and all matters, claims or causes of action (whether in contract or tort) based upon, arising out of or relating to this Patent Assignment or the negotiation, execution or performance of this Patent Assignment, shall be governed by, and construed in accordance with, the laws of the State of New York, without giving effect to any choice or conflict of laws provision or rule (whether of the State of New York or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of New York.

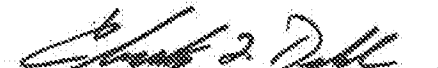

This Patent Assignment may be executed by the parties hereto in separate counterparts, each of which when so executed shall be deemed to be an original and all of which when taken together shall constitute a single agreement.
