ASSIGNMENT

By virtue of an assignment recorded in the United States Patent and Trademark Office at Reel 038840 Frame 0540, PAQ, LTD a Colorado company ("Assignor") is assignee, of the entire right title and interest in "Airtight Child Resistant Case With Elongated Compartments", as described in the U.S. Patent Application Serial Number: 15/175,985 filed June 7, 2016 (the "Patent Application").

Now, PAQ Holdings, LLC, a Florida company ("Assignee") desires to acquire all rights in and to the Patent Application any continuation, continuation-in-part and divisional applications and any patents (and any reissues or extensions) that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee 100% of its right, title, and interest in the invention and Patent Application (as well as such rights in any divisions, continuations in whole or part, or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
