ASSIGNMENT

This assignment is by:

PACIFIC AIR FILTRATION HOLDINGS, LLC, a Delaware company (referred to in this assignment as "PAF" or "Assignor").

This Assignment is to:

Assignee: **Wellair Filtration LLC**
Address: 9905 Berger Rd., Columbia, MD 21046

A limited liability company duly organized under and pursuant to the laws of: Delaware

(referred to in this Assignment as "Assignee"), who desires to confirm acquisition and acquire all of Assignee's right, title and interest in the letters patent of the United States and worldwide, and to all inventions set forth and the patents and applications identified in **Schedule I hereto** (the "PAF Patent Rights").

Assignee has acquired by assignment of the Assignor certain new and useful inventions in:

Electrostatic Devices

for which applications for letters patent in the United States of America have been or will be filed and on which U.S. Patents have been issued.

For good and valuable consideration, the sufficiency of which are hereby acknowledged,

1. To the extent owned by PAF prior to the Effective Date, PAF agrees to assign, and hereby does assign to Assignee, PAF Patent Rights effective as of the Effective Date. PAF hereby sells, assigns, transfers and sets over, to Assignee, its successors, legal representatives and assigns, PAF's entire right, title and interest in and to the inventions relating to Electrostatic Devices, including application for letters patent, and any and all letters patent or patents in the United States of America, worldwide and in all foreign countries which may be granted therefor and thereon, and in and to any and all provisional applications, divisions, continuations, continuations-in-part and substitutions of said application, or reissues, re-examinations or extensions of said letters patent or patents, and all rights under the International Convention for the Protection of Industrial Property held by PAF, the same to be held and enjoyed by Assignee (including all rights of priority and any right to institute actions and to recover for past, present and future infringement), for its own use and the use of its successors, legal representatives and assigns, to the full end of the term or terms for which letters patent or patents may be granted, as fully and entirely as the same would have been held and enjoyed by PAF, had this assignment not been made. For the avoidance of doubt and without limitation, the assignment includes PAF's right title and interest in and to the inventions described in the applications listed in Schedule I hereto.

2. PAF shall promptly sign and execute all rightful papers and documents, take all lawful oaths, and do all acts necessary, required or useful for the procurement, maintenance, enforcement, defense or otherwise to secure title thereto to Assignee, at the sole cost and expense of Assignee, its successors, legal representatives and assigns, in each case including, without limitation, arising from or relating to (a) said inventions, or said application for letters patent; (b) letters patent for said inventions in any country, including any reissue, re-examination or extension of or interference proceedings; or (c) any provisional, division, continuation, continuation-in-part, or substitutions of any application for letters patent or any reissues, re-examinations, extensions or interference proceedings involving any letters patent, to be obtained thereon. To be clear, for purposes of this paragraph, "desirable" shall include, without limitation, any act necessary or useful in connection with United States laws and/or international conventions.

3. PAF hereby authorizes and requests the Commissioner of Patents in the United States to issue the above mentioned letters patents of the United States to Assignee as the assignee of said inventions and the letters patent to be issued thereon for the sole use of Assignee, its successors, legal representatives and assigns.

In witness whereby, executed by the undersigned on the date(s) opposite the undersigned name(s).
