PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT is entered into as of December 10, 2018 ("Assignment") by and between GE Aviation Systems LLC, a company formed under the laws of Delaware with an address at 3290 Patterson Ave SE, Grand Rapids, Michigan 49512 ("Assignor"), and MRA Systems, LLC, a company formed under the laws of Delaware with an address at 103 Chesapeake Park Plaza, Baltimore, Maryland 21220 ("Assignee").

Now, therefore, for good and valuable consideration, receipt and sufficiency of which is hereby acknowledged, Assignor hereby agrees as follows:

1. Patent Assignment. Assignor hereby sells, assigns, conveys, grants and transfers unto Assignee, its successors and permitted assigns, the following:

(a) Assignor's entire right, title and interest in and to the Patents. "Patents" shall mean: (i) the patents and patent applications set forth on Schedule A attached hereto, and all inventions described or claimed therein and improvements thereto, (ii) all foreign counterparts thereof, (iii) the right to claim priority, (iv) any reissues, renewals, continuations, continuations-in-part, and divisions (in whole or in part) revisions, substitutions, extensions and reexaminations thereof, and (v) all patents of the United States and foreign countries issuing on any of the foregoing, together with all registrations, reissues, re-examinations, supplemental protection certificates, or extensions thereof, and any foreign counterparts thereof, all to be held and enjoyed as fully and exclusively as they would have been by Assignor had this assignment and transfer not been made; and

(b) All claims, demands and rights of action, both statutory and based upon common law, that Assignor has or might have by reason of any infringement of the Patents prior to, on or after the date of this Assignment, together with the right to prosecute such claims, demands and rights of action in Assignee's own name; and

(c) All of Assignor's right, title and interest in and to any and all income, royalties, damages and payments now or hereafter due and/or payable under and with respect to the Patents, including, without limitation, the right to recover for past, present or future infringements of the Patents.

2. Enforceability. If any term or provision of this Assignment is adjudged invalid or unenforceable, in whole or in part, or as applied to any circumstance, (i) the remaining terms and provisions hereof shall be unimpaired and shall remain in full force and effect, and (ii) the invalid or unenforceable provision or term shall be replaced by a term or provision that is valid and enforceable and that comes closest to expressing the intention of such invalid or unenforceable term or provision.

3. Recordal. Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks and any other applicable governmental entity or registrar (including any applicable foreign or international office or registrar), to record Assignee as the owner of the Patents, and to issue any and all Patents to Assignee, as assignee of Assignor's entire right, title and interest in, to, and under the same. Assignee shall have the right to record this Patent Assignment with all applicable government authorities and registrars so as to perfect its ownership of the Patents.

4. Further Assurances. Assignor shall provide Assignee, its successors, assigns or other legal representatives, reasonable cooperation and assistance at Assignee's request and expense (including the execution and delivery of any and all affidavits, declarations, oaths, exhibits, assignments, powers of attorney or other documentation as may be reasonably required) as are requested by Assignee to effect, register, maintain, defend, enforce or otherwise exploit the rights assigned herein, including: (a) the preparation and prosecution of any applications or registrations assigned herein; and (b) the prosecution or defense of any interference, opposition, reexamination, reissue, review, infringement or other proceedings that may arise in connection with any of the rights assigned herein, including, but not limited to, testifying as to any facts relating to the rights assigned herein. If Assignee is unable for any reason, after reasonable effort, to secure the Assignor's signature on any document needed in connection with the actions specified above, Assignor hereby irrevocably designates

5. Miscellaneous. Nothing in this Agreement shall confer any rights upon any person or entity other than Assignor and Assignee and each such party's respective successors and permitted assigns. This Assignment shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns. This Assignment may be executed in any number of counterparts and any party hereto may execute any such counterpart, each of which when executed and delivered shall be deemed to be an original and all of which counterparts taken together shall constitute but one and the same instrument.
