Assignment of Invention and Patent Application

The undersigned person ("Assignor") is a co-inventor of the following invention for which the following patent application, identified below ("Application"), has been filed in the United States:

Application No.	Date Filed	Title
16/684,281	14-Nov-2019	Integrated Form

J P Specialties, Inc. ("Assignee"), a California corporation, whose address is 25811 Jefferson Ave., Temecula, CA 92562, desires to acquire the invention as described in the Application listed above, and any domestic and foreign patent applications and domestic and foreign patents that may be obtained which claim priority to the Application.

For good and valuable consideration, the receipt of which is acknowledged, Assignor sells, assigns, transfers and sets over to Assignee or its heirs, successors, assigns or other legal representatives the full and entire right, title and interest in and to the invention and the Application, including the right of Assignee or its heirs, successors, assigns or other legal representatives to (1) file any and all divisional, continuation, and continuation-in-part applications, claiming priority to the Application and (2) seek reissues or extensions of any patent, which the Assignee may hold and enjoy as fully and entirely as Assignor would have, had this Assignment and sale not been made.

Assignor agrees that it or its heirs, successors, assigns or other legal representatives will at any time on the request and at the expense of Assignee or its heirs successors, assigns or other legal representatives, without undue delay, execute and deliver any and all papers and do all lawful acts that may be necessary or desirable to perfect the title to the invention, the Application and any application and applications claiming priority therefrom and any patent or patents that human be obtained therefrom.

Assignor further assigns to Assignee or its heirs, successors, assigns or other legal representatives the whole right, title and interest in and to the invention throughout all countries foreign to the United States, including the right to (1) file any foreign patent applications claiming priority to the Application and to otherwise seek any patent in any foreign country; (2) file any divisional, continuation, and continuation-in-part applications claiming priority to the foreign patent application where such procedure is proper; and (3) seek reissues or extensions of any patent in any foreign country. Assignor ratifies any acts of Assignee in applying for a patent in Assignee's own name in any foreign country where such procedure is proper, agrees to execute foreign patent applications in the several countries where it is necessary that they be

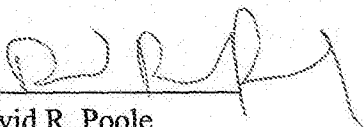

executed by the inventor, and agrees to execute assignments of foreign patent applications and any patent to be obtained therefrom to Assignee.

Assignor grants to Assignee the full right to sue for and recover all profits and damages recoverable for past infringement of the invention, the Application, and any patent or patents that may be obtained in any country therefrom, for Assignee's use and behalf, and for the use and behalf of Assignee's heirs, successors, assigns and other legal representatives.

Assignor represents and warrants that Assignor has the full right to convey the entire interest of the invention and the Application and has not granted any rights inconsistent with the rights granted in this Assignment.

Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and any other official of any country foreign to the United States whose duty it is to issue patents, to issue any patent and any reissues and extensions therefrom to Assignee in accordance with this Assignment.
