ASSIGNMENT

Elizabeth TABOR and **Dick STREICHER**, citizens of the United States of America residing in the State of Iowa, are the inventors ("Inventors") and have made a certain new and useful invention for a "AIR CEILING INLET UNIT" (the "Invention") for which the undersigned is about to make a provisional patent application in the United States Patent and Trademark Office based upon the Invention. Based upon the provisional, the Inventors also intend to file a nonprovisional application in the United States Patent and Trademark Office for Letters Patent of the United States, which nonprovisional application when filed will be assigned a serial number, Serial No. 16/748,320 filed Jan. 21, 2020; (the applications and all patents issued based upon the applications being hereinafter referred to as the "Patent").

WHEREAS, **DOUBLE L GROUP, LLC**, 2020 Beltline Road, Dyersville, IA 52040 ("Assignee") is desirous of acquiring the entire interest in and to the Patent and the invention covered by it.

WHEREAS, the Inventors have a duty to assign the Invention to the Assignee.

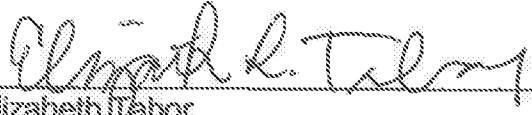

NOW, THEREFORE, in consideration of One (1) Dollar and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Inventor does hereby sell, assign, and transfer to Assignee and the legal representatives, successors and assigns of the Assignee, the entire right, title and interest in and to the Invention and the Patent, and any reissue or reissues of the Patent, including any and all divisionals and continuations of said Patent, in the United States and all countries foreign to the United States, the same to be held and enjoyed by the Assignee as fully and entirely as the same would have been held and enjoyed by the undersigned had this assignment and sale not been made, and together with all claims for damages by reason of past infringement of the Patent with the right to sue for and collect the same for the Assignee's own use.

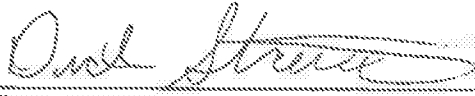

Each Inventor hereby authorizes the Assignee to insert the Serial No. and filing date of the nonprovisional application for the Patent, when such information is received.

Each Inventor also covenants and agrees with the Assignee that the Inventor has the full right to convey the interest sold and assigned and has not executed and will not execute any writing or do any act whatsoever in conflict with the rights and interest assigned; and that the Inventor will at any time upon request, without further or additional consideration, but at the expense of the Assignee: execute such additional assignments and other documents and do such additional acts as the Assignee may deem necessary or desirable to perfect or confirm this assignment and the Assignee's enjoyment of the rights acquired; and aid in enforcing any rights accruing as a result of the Patent by giving testimony in any proceedings or transactions involving the Patent and by cooperating in the execution of documents, statements, affidavits, etc. that may be required in any such proceeding or transaction.

It is understood that the foregoing covenants and agreements shall bind the legal representatives of the undersigned and inure to the benefit of the legal representatives, successors and assigns of the Assignee.

Dated the 21 day of January, 2019.
