## PATENT ASSIGNMENT

WHEREAS, MJSI, Inc., an Illinois corporation, and Sustainable Source, LLC (collectively, "Assignor") are the owner of certain inventions, patent applications and patents, all of which are listed on Exhibits A and B, attached hereto and incorporated herein for all purposes by reference; and

WHEREAS, Danco, Inc., a Delaware corporation, with offices at 2727 Chemsearch Boulevard, Irving, Texas 75062 ("Assignee"), desires to acquire all rights, title and interest in and to such inventions, patent applications, and patents;

NOW THEREFORE, for One Dollar and Other Good and Valuable Consideration, the receipt and adequacy of which is hereby acknowledged, Assignor does hereby sell, assign and transfer unto Assignee, and its successors, assigns and legal representatives, the full and exclusive right, title and interest in and to said inventions, patent applications, patent which may be or have been granted thereupon identified on Exhibit A hereto, all designs, models, drawings, divisions, provisionals, reissues, substitutions, continuations, continuations-in-part, renewals and extensions thereof, and all rights to obtain worldwide patent protection for the inventions, patent applications and patents listed on Exhibits A and B.

Assignor hereby authorizes the Commissioner of Patents and Trademarks or foreign equivalent to issue all patents for said invention, or patents resulting therefrom in the name of Assignee.

Assignor also sells, assigns and transfers to Assignee and its successors, assigns and legal representatives, the full and exclusive rights relating to the inventions, patent applications, patents which may be or have been granted thereupon, including all rights of priority, all rights to publish cautionary notices reserving ownership of said invention, all rights to register said inventions in appropriate registries, all rights to enforce said rights against others and recover damages for infringement (except as otherwise set forth in the Asset Purchase Agreement between Danco and MJSI) thereof, the right to file applications and obtain patents, utility models, industrial models, and designs for such inventions in its own name throughout the world.

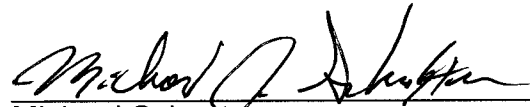

Assignor further agrees to execute any and all powers of attorney, applications, assignments, declarations, affidavits and any other documents in connection therewith necessary to vest and perfect such rights, title and interest in Assignee, its successors, assigns and legal representatives.

Assignor agrees that it will communicate to Assignee and its successors, assigns and legal representatives any facts known to Assignor respecting any improvements and, at the expense of Assignee, testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue and substitute applications, make all lawful oaths and generally do everything possible to vest title in Assignee and to aid Assignee, its successors and assigns to establish, maintain, secure and perfect title in Assignee, its successors and assigns to said inventions, patent applications, patent which may be or have been granted thereupon identified on Exhibits A and B hereto and to obtain and enforce proper protection for said invention in all countries.

Assignor covenants that it owns the rights being conveyed in this assignment, has not previously encumbered or assign such rights to any other person or entity and has full right to make this assignment.

IN WITNESS WHEREOF, the Assignor has caused this Assignment to be executed this 21st day of November 2012.
