## ASSIGNMENT AGREEMENT

This Assignment Agreement is between Probe Technology Services, Inc., a corporation formed under the laws of Texas and located at 1132 Everman Parkway, Fort Worth, TX 76140 (the "**Assignee**") and Frank Wallace (the "**Inventor**").

**Whereas**, the Inventor has invented certain new and useful improvements (the "**Inventions**") disclosed in an application for United States Letters Patent entitled NOVEL CALIPER-ARM RETENTION SYSTEM, filed with the United States Patent and Trademark Office on February 19, 2019, and having serial number 62/807,657 (the "**Application**").

**Whereas**, Assignee wishes to acquire all rights, title, and interest in and to (1) the Inventions; (2) the Application (including the right to claim priority to the Application); (3) any United States or foreign patent that may issue from the Application; and (4) any United States or foreign patent applications or patents related to the Application through a claim of priority, including any application filed under the Patent Cooperation Treaty (PCT).

**Whereas**, the Inventor wishes to assign to Assignee all rights, title, and interest in the Inventions, the Application (including all right to claim priority to the Application), any application related to the Application through a claim of priority (including any foreign or PCT application), and any patents that may issue from the Application or any application related to the Application through a claim of priority.

**DEFINITIONS.** For purposes of this Assignment Agreement: (1) "**foreign patent applications**" includes legal equivalents and analogs of United States patent applications; (2) "**foreign patents**" includes legal equivalents and analogs of United States patents; (3) "**foreign patent office**" includes legal equivalents and analogs of the United States Patent and Trademark Office; and (4) "**Assignee**" includes Probe Technology Services, Inc. and its successors and assigns.

**ASSIGNMENT.** For good and valuable consideration, the receipt of which is hereby acknowledged, the Inventor hereby sells, assigns, transfers, and sets over to Assignee, his or her entire right, title, and interest in and to: (1) the Inventions; (2) the Application; (3) any United States or foreign patent that may issue from the Application; (4) any United States or foreign patent applications or patents related to the Application through a claim of priority; (5) the right to sue for past, present, and future infringement, including the right to collect for damages from past infringement; (6) all priority rights for the Inventions under international conventions or otherwise throughout the world, and (7) the right to file the Application and any application claiming priority to the Application, including any application filed under the Patent Cooperation Treaty, and to be granted thereon any and all Letters Patent.

**REPRESENTATIONS.** The Inventor hereby represents and warrants that he or she has full right to convey the entire interest assigned with this Assignment Agreement, and
