ASSIGNMENT

In exchange for valuable consideration provided by **ENOVATE CORP.**, the receipt and sufficiency of which being hereby acknowledged, I, Oscar Mauricio Molina Ortiz, being the inventor of an invention related to an application for determining fracture interference (sometimes hereinafter referred to as "ASSIGNOR", or collectively referred to as "ASSIGNORS"), including as disclosed and described in United States of America for a Nonprovisional Patent Application titled "METHOD OF DETERMINING FRACTURE INTERFERENCE IN A HYDRAULICALLY FRACTURED WELL", do hereby ASSIGN, SELL, TRANSFER, and CONVEY to **ENOVATE CORP.** having a business address of 24624 Interstate 45 North, Suite 200, Spring, Texas 77386 US (sometimes hereinafter called "ASSIGNEE"), its successors and assigns, the entire right, title and interest throughout the world in and to:

1. Said invention disclosed and described in United States of America Nonprovisional Patent Application sometimes referred to as "*Method of Determining Fracture Interference in a Hydraulically Fractured Well*";
2. All applications and patents worldwide on said invention and/or claiming priority or benefit, directly or indirectly, in whole or in part, to the foregoing applications, including but not limited to all United States non-provisional applications, Patent Cooperation Treaty applications, foreign (non-US) filed applications, national stage entry applications;
3. All applications for patent or like protection on said invention that have now been or may in the future be made by us or our legal representatives, including any continuation, continuation-in-part and any other utility applications that may be based on this invention, whether in the United States of America or any other place anywhere in the world;
4. All patents and like protection that have now been or may in the future be granted on said invention to us or our legal representatives, whether in the United States or in any other country or place anywhere in the world;
5. All substitutions for and divisions, continuations, continuations-in-part, renewals, reissues, extensions, and the like of said applications and patents and like grants, including without limitation, those obtained or permissible under past, present and future laws and statutes;
6. All rights of action on account of past, present and future unauthorized use of said invention and for infringement of said patents and like protection;
7. The right in ASSIGNEE to file in its name applications for patents and like protection for said invention in any country or countries foreign to the United States; and

8. All international rights of priority associated with said invention, applications, patents, and like protection;

Each ASSIGNOR covenants that he/she, and any applicable heirs, legal representatives, assigns, administrators, and executors, will, at the expense of ASSIGNEE, its successors and assigns, execute all papers and perform such other acts as may be reasonably necessary to give ASSIGNEE, its successors and assigns, the full benefit of this Assignment.

Each ASSIGNOR covenants, represents, and warrants that: he/she has disclosed the best mode known to him/her related to said invention, knows of no documents, disclosures, uses, or other prior art that would prevent patenting said invention, and has not transferred or assigned (and is not under an obligation to transfer or assign) the rights assigned, sold, and conveyed herein to ASSIGNEE to another person or entity.

Each ASSIGNOR further covenants, represents, and warrants that: he/she is an original and true inventor of said invention; the right, title, and interest herein conveyed is free and clear of any encumbrance; and he/she has the full right to convey the same as herein expressed.

Executed at Spring (city), Texas (state), US, this 11 day of February 2020.

Oscar Mauricio Molina Ortiz
