ASSIGNMENT

ASSIGNMENT made by **Adolf Würth GmbH & Co. KG**, a corporation organized under the laws of Germany having a place of business at Reinhold-Würth-Strasse 12-17, 74653 Künzelsau, Germany to **Würth International AG.**, a corporation organized under the laws of Switzerland, and located and doing business at Aspermontstrasse 1, 7000 Chur, Switzerland.

IN CONSIDERATION of One Dollar (\$1.00) and other good and valuable considerations, the receipt of which is hereby acknowledged, said **Adolf Würth GmbH & Co. KG**, hereby sell, assign and transfer to said **Würth International AG.**, its successors and assigns, the entire right, title and interest in:

CASE FOR ACCOMMODATING TOOLS OR SMALL PARTS

and the invention therein as set forth in their application for United States Letters Patent therefor, Serial No. 15/534,098 filed June 8, 2017, and in and to said application and any divisions or continuations thereof, and any Letters Patent obtained for the said invention in the United States and foreign countries, or issuing out of said application or any such division or continuation thereof, and any reissues or extensions of any such Letters Patent.

The Commissioner of Patents is hereby authorized and requested to issue Letters Patent for said invention to said **Würth International AG.**, as assignee of the entire right, title and interest therein.

And, said **Adolf Würth GmbH & Co. KG**, hereby covenants that they have full right to convey the entire right, title and interest in said invention, and that they have not executed and will not execute any agreement in conflict herewith.

And, they further covenant that they will, at any time, upon request, execute and deliver any and all papers that may be necessary or desirable to perfect the title in said

Attorney Docket No. 1825.066

Würth International AG., to said invention or any Letters Patent that may be granted therefor, and that if said **Würth International AG.**, or its assignee, desires to make a substitute, divisional or continuation application for said invention, or to secure a reissue or extension of said Letters Patent, to file a disclaimer relating thereto, or an application for a corresponding patent in any foreign country, that they will, upon request, sign all papers, make all rightful oaths, and do all lawful acts requisite for the said purpose, but at the expense of said **Würth International AG.**.

And, they further covenant and acknowledge that the entire beneficial interest in the invention to which the above application relates is irrevocably vested in the assignee including the right to make applications for protection in all countries abroad and to claim priority under the International Convention for such applications and hereby assent to the making of any such applications, with or without priority claim, and of any divisional applications resulting therefrom.

And, they further covenant that they will at all times, communicate to the said **Würth International AG.**, its successors, assigns, or legal representatives, all facts relating to said invention and Letters Patent, or the history thereof, known to them, and testify as to the same in interferences or other litigation when requested so to do.

They also hereby authorize the law firm of Boyle Fredrickson S.C., and all attorneys associated with Customer Account No. 23598 the power to insert in this instrument any further identification which may be necessary or desirable in order to comply with the rules of the United States Patent Office for recordation of this document.

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 12 sedentary women, 30 to 45 years of age, who were randomly assigned to a 10-week training program or a control group. The training program consisted of three sessions per week of aerobic exercise at 60% of maximum HR. The control group did not exercise. The HR and EE were measured at rest and during a 30-min submaximal exercise test at the beginning and at the end of the 10-week period. The results showed that the training program significantly increased the HR and EE of the subjects. The HR increased from 68 to 72 beats/min at rest and from 145 to 155 beats/min during exercise. The EE increased from 1.2 to 1.4 kcal/min at rest and from 2.5 to 3.0 kcal/min during exercise. The results suggest that a 10-week training program can improve the cardiovascular fitness of sedentary, middle-aged women.
