PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (“Assignment”) is made and entered into as of this 2nd day of October, 2019 (“Effective Date”), by and between **WACKER NEUSON PRODUCTION AMERICAS LLC**, a Wisconsin limited liability company (the “Assignor”), and **HUSQVARNA CONSTRUCTION PRODUCTS NORTH AMERICA, INC.**, a Delaware corporation (“Assignee”).

WHEREAS, Assignor and Assignee are parties to that certain Asset Purchase Agreement dated as of October 2, 2019 (the “Agreement”), and;

WHEREAS, pursuant to the Agreement, Assignor wishes to assign to Assignee, and Assignee wishes to acquire from Assignor, all patents and patent applications that constitute Registered IP (as that term is defined in the Agreement), any continuations, divisions, continuations-in-part, reissues, reexaminations, extensions or foreign equivalents thereof, and the subject matter of all claims recited therein, including but not limited to the patents and patent applications set forth on Schedule A attached hereto (collectively, the “Patents”).

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, assign, transfer and set over to Assignee, its entire right, title and interest in and to the Patents, for the United States and for all other countries, including, without limitation, all corresponding rights that are or may be secured under the laws of the United States or any other country or under international conventions and treaties, now or hereafter in effect, for Assignee’s own use and enjoyment, and for the use and enjoyment of Assignee’s successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties or payments due or payable with respect thereto as of the Effective Date or thereafter, all causes of action (either in law or in equity) relating thereto, and the right to sue, counterclaim, and recover damages for past, present or future infringement or other unauthorized use of the Patents.

Assignor hereby requests the Commissioner for Patents, and the corresponding entities or agencies in any other applicable countries, to record Assignee as the assignee and owner of the Patents.

To the extent that any provision of this Assignment conflicts or is inconsistent with the terms of the Agreement, the Agreement will govern.

This Assignment and any dispute arising out of or relating to or in connection with this Assignment shall be governed by, and construed in accordance with, the laws of the State of Delaware, regardless of the laws that might otherwise govern under applicable principles of conflicts of laws thereof.

This Assignment may be executed in one or more counterparts, and by each of the parties in separate counterparts, each of which when executed shall be deemed to be an original but all of which taken together shall constitute one and the same original instrument. Delivery of an executed counterpart of a signature page to this Assignment by electronic means (including

portable document format) shall be as effective as delivery of a manually executed counterpart of this Assignment.
