## ASSIGNMENT OF PATENTS

THIS ASSIGNMENT OF PATENTS ("Assignment"), dated as of January 22, 2019, from ADVANCED EXTRACTION TECHNOLOGIES, INC., a Texas corporation ("Assignor"), to BRECOR HOLDINGS LLC, a Delaware limited liability company ("Assignee");

### RECITALS

Assignor, Assignee and Industrias BRE, S de RL de CV ("Bre") are parties to the Foreclosure Agreement of even date herewith (the "Foreclosure Agreement," capitalized terms used but not defined herein having the meanings given such terms in the Foreclosure Agreement), providing for (among other things) Assignor's conveyance of the Assets (as defined below and in the Foreclosure Agreement) to resolve Assignor's defaults under the Note, Security Agreement and other Loan Documents (as such terms are defined in the Foreclosure Agreement) to Assignee (an affiliate of Bre) in lieu of foreclosure and to avoid the necessity of litigation, foreclosure and the delays associated therewith.

Assignor is the owner of a certain issued patents and pending patent applications in the United States Patent and Trademark Office as well as patents and patent applications in the office of the Commissioner of Patents of the Canadian Intellectual Property Office and the Mexican Institute of Industrial Property (*Instituto Mexicano de la Propiedad Industrial*), all as identified on Exhibit A attached hereto (collectively, the "Patents").

Section 2.4 of the Foreclosure Agreement contemplates the Assignor's execution and delivery of this Assignment of Patents to provide for Assignor's assignment of the Patents and associated rights to Assignee to carry out the intents and purposes of the Foreclosure Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt, sufficiency and adequacy of which are hereby acknowledged, Assignor does hereby sell, assign and transfer unto the Assignee, its successors and assigns, all right, title and interest in and to all domestic and foreign patents and domestic and foreign applications for patents, fees or royalties with respect to the method or process of treating natural gas by rejecting or removing nitrogen therefrom or by recovering hydrocarbons, helium or other components from natural gas and in designing and implementing process units to carry out the foregoing, and including without limitation the right to sue for past infringement and damages therefor, and licenses thereunder, all as presently existing or hereafter arising or acquired, including without limitation the Patents listed on Exhibit A and any divisionals, continuations, continuations-in-part, or reissues thereof, or any related foreign patents or patent applications.

Assignor agrees, without further consideration, to take such further actions as may be reasonably requested by Assignee in order to carry out the provisions and purposes of this Assignment including, without limitation, to execute one or more further assignments covering the Patent Rights in a form acceptable for recordation in the United States Patent and Trademark Office, the Commissioner of Patents of the Canadian Intellectual Property Office, the Mexican

Institute of Industrial Property (*Instituto Mexicano de la Propiedad Industrial*) or any other patent or regulatory offices.

Nothing in this instrument, expressed or implied, is intended or shall be construed to give any person, firm or corporation, other than Assignee and its successors and assigns, any right, remedy, claim or cause of action under or by reason of this instrument, or any terms, covenants or conditions hereof and all of the terms, covenants, conditions, promises and agreements in this instrument shall be for the sole and exclusive benefit of Assignee and its successors and assigns.

*[Remainder of Page Intentionally Left Blank]*

IN WITNESS WHEREOF, the Assignor has executed and delivered this instrument as of the date first above written.
