DECLARATION OF LUCAS SALIM GERONIMI

1. I, Lucas Salim Geronimi, declare that I am a citizen of Brazil, residing at the address of Rua Pedro Alberto Cavalca, no. 5, Bairro Loteamento Village das Palmeiras, Lorena, SP, CEP 12600-636, Brazil.

2. I am an inventor, entrepreneur, and businessman in the plastics recycling industry and, more specifically, the inventor of systems and methods of thermochemical treatment of plastic residues and elastomers for purposes of recycling.

3. I have previously worked with Hélio Da Igreja, a citizen of Brazil, residing at the address of Rua Atilio Formighieri, 556, room 01, Toledo, PR, CEP 85901-030.

4. I am informed and believe, and upon such information and belief allege, that Hélio Da Igreja through his attorneys filed a U.S. Patent Application Serial No. 16/209,281 (also assigned Attorney Docket No. 152-024) with the U.S. Patent and Trademark Office (USPTO) on December 4, 2018.

5. The U.S. Patent Application Serial No. 16/209,281 has since been granted as U.S. Patent No. 10,544,936 (hereinafter, "the Patent") on January 28, 2020.

6. The Patent claims an invention comprising a thermochemical treatment system of plastic and/or elastomeric waste, among other limitations.

7. I contributed to the conception of the invention as recited in at least one of the claims made in the Patent.

8. I and Hélio Da Igreja also executed the enclosed Private Intellectual U.S. Patent No. 10,544,936

Property Assignment Agreement (hereinafter "the Agreement") on December 12, 2018.

9. The Background section of the Agreement acknowledges that both I and Hélio Da Igreja together developed the "thermochemical system for treatment of plastic residues and elastomers," which formed the basis for the Patent.

10. The Background section of the Agreement also acknowledges that the Patent was initially filed in the name of Hélio Da Igreja alone "due to reasons of practicality."

11. The Agreement therefore further establishes that I, Lucas Salim Geronimi, am a co-inventor or joint inventor of the invention claimed in the Patent.

12. The Purpose section of the Agreement states that "[t]he purpose ... is the free assignment of half (50%) of the rights on and related to the patent request" from Hélio Da Igreja as Assignor, to Lucas Salim Geronimi as Assignee.

13. It is my reasoned belief that the Purpose section of the Agreement recognizes and memorializes my position as a co-inventor or joint inventor, and does not diminish any rights of ownership I have as a co-inventor or joint inventor to the claimed invention.

14. As a co-inventor or joint inventor of the invention claimed in the Patent, and notwithstanding the additional transfer of a partial ownership interest to myself from Hélio Da Igreja in the Agreement, I am an owner of the entire Patent and may make, use, offer to sell, or sell the patented invention within the United States, or import the patented invention into the United States, without the consent of and without accounting to the other co-inventor or joint inventor, Hélio Da Igreja.

15. It is my reasoned belief that, on the basis of the same facts as set

U.S. Patent No. 10,544,936

forth hereinabove, I am also a co-inventor or joint inventor with the same ownership interest as U.S. Patent No. 10,544,936 in any further utility, continuation, international stage (PCT), national stage, continuation-in-part disclosing improvements, additions, and/or modifications, or divisional applications, and any other Patent to be obtained therefor in the United States of America, and in all other foreign countries or jurisdictions, relating to the invention described and claimed in U.S. Patent No. 10,544,936.

16. I declare further that all statements made herein are true and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this document and the application to which it relates.
